DoD Directive Threatens Service People With Auto Insurance Boost

INCREASED operating costs imposed upon insurance companies in complying with a Pentagon directive on motor vehicle liability threatens to increase the cost of automobile insurance to Service people.

The directive has two purposes. It is aimed at protecting members of the Armed Forces against fly-by-night insurance companies. At the same time, it requires that all military and civilian personnel operating privately-owned automobiles at military installations are properly insured.

The directive, while setting up minimum requirements for insurers and agents, leaves to more than 800-post, base, and station commanders the task of passing upon letters of application

from the insurance companies and deciding which can operate on their respective installations.

In an action that is burdensome and expensive to insurance companies, the directive requires that each company

BOB TELLS DAVE ABOUT DoD BILLS

(The following is the text of a letter sent by Secretary of Defense Robert S. "Bob" McNamara to David E. "Dave" Bell, Director of the Bureau of the Budget.)

Dear Dave:

In accordance with Bureau of the Budget Circular A-19, there is attached a listing reflecting the proposed Department of Defense Legislative Program for 1962.

The program is divided into two parts:

Part I: Those proposals which the Department believes of sufficient importance to be included in the President's Legislative Program; and

Part II: Other proposals to be sponsored by the Department.

Draft proposals have already been submitted to your office for clearance on most of the listed proposals and the remaining items will be submitted as coordination within the Department is completed. Studies are currently being conducted as to the need for legislation in a few additional areas. The proposals will be forwarded to you as they become available.

The listing of expiring laws was submitted to your office by separate memorandum dated September 7, 1961.

Sincerely yours,
/s/ Bob
Secretary of Defense

RETIRED PAY JUSTICE GETS "PRIORITY" STATUS:

Bolté Promotion Plan Tops DoD Bills Headed For Congress; "Tombstone" Reprieve Will Be Urged

(ALL SERVICES AFFECTED, PAGE 3)

THE Pentagon has wrapped up the fiscal '62 military legislative package and sent it to the Bureau of the Budget. Biggest new personnel item in the package is the Bolté proposal overhauling the Officer Personnel Act.

THE JOURNAL has obtained the text of the Pentagon communication, which is published herewith.

Secretary of Defense McNamara told Budget Director David E. Bell that the Bolté legislation is worthy of special mention in the President's January message to Congress, along with multi-billion dollar authorization bills for military construction and major procurement.

Twelve other Defense Department measures, including retirement pay re-computation, increased per diem, and new RIF pay for Reservists, have been assigned "priority" status by Secretary McNamara.

Thirty-seven additional proposals also are included in the Pentagon package. Of the new measures, two affecting retirement will be of special interest to Service families.

One will prohibit officers and warrant officers, with certain exceptions, from retiring in a higher grade than that in which they served for at least six months on active duty.

The other will restore "tombstone" promotions to Naval and Marine Corps officers who were on the temporary

OFFICERS HIT HARDEST:

Change Army Diet To Cut Heart Disease

TWO senior Army physicians have urged a change in the standard Army diet to prevent further increases in soldier heart disease.

They said that the Army diet is of the type that has been associated with a

disability retirement list on 1 November 1959 and who later were restored to active duty and then re-retired.

Another important new bill seeks free transportation for military dependents requiring medical care not available at the military installation where they are residing. The proposal will cost an estimated \$60,000 annually.

Legislation to speed the emergency evacuation of military dependents from overseas areas also is included in the

AF School Choices, Appointments

The Air Force has announced its selections for the '62 classes at the National War College and Industrial College, and has released the names of Reserve officers in the five-year group who have been chosen for Regular commissions.

Page 9

A "Lost Study" At The Pentagon

Secretary of Defense McNamara can expect Senate Armed Services interrogation as to what happened to a promised Pentagon study on the military retirement system. An editorial notes that this is "typical of the lack of attention which has been given by the Pentagon leadership to the problem of retired pay."

Page 10

Army Colonel Next Navy Secretary?

There's a possibility that a combat-wounded Army colonel will be the next Secretary of the Navy. He's Col. Kenneth E. BeLieu, USA-Ret., a former Executive Officer to two Secretaries of the Army.

Page 12

TWO NEW ARMY COMMANDS; GENERAL STAFF SLASH SEEN

THE Army has devised plans to activate two new major commands, strengthen a third, and slash its headquarters staff.

Secretary of Defense McNamara is expected momentarily to give a green light to the Army proposals. It will be one of the major Pentagon reorganization actions he has taken since assuming office in January.

The two new Army commands will be (1) a Research and Materiel Command—possibly to be located at Ft. Meade, Md., and (2) a Combat Developments Command. (New Directive For Defense Supply Agency, Page 26)

Secretary McNamara has been holding a series of meetings with Deputy Secretary Roswell L. Gilpatric, Secretary of the Army Elvis Stahr, jr., and Under Secretary of the Army Stephen Alles on the sweeping reorganization scheme.

A major proposal calls for a reduction of hundreds of officers now assigned to the General Staff and Technical Service headquarters. They will be assigned to activities in the field.

Secretary Stahr has proposed to Secretary McNamara that the Continental Army Command at Ft. Monroe, Va., be strengthened by the addition of training responsibilities now under cognizance of the Technical Services and combat branches.

An Army Reorganization Task Force, led by Deputy Comptroller L. W. Hoelscher, had proposed originally that CONARC be redesignated as the Forces Development Command. For the sake of simplicity, it was decided to retain the present name.

Similarly, the Hoelscher Committee recommended that Army General Staff designations be changed coincidental with a realignment of General Staff functions. There will be changes in functions, but the names will not be

Army Promotions

The Army expects to promote approximately 300 captains to temporary major in November—through No. 1800 on the eligibility list. There will be about 170 advancements to lieutenant colonel, through No. 1146, and 30 to colonel, through No. 148.

Turn to page 16 for latest Army temporary promotions.

Pentagon Tells Details Of New Bills Affecting Officers In All Services

THREE new bills in the Defense Department's fiscal '62 legislative program have been spelled out in detail. They include proposals to:

- Revive Navy-Marine Corps "tombstone" promotions
- Speed 20-year retirement of Army and AF Regulars
- Increase retirement credit for Navy Nurses

Not waiting for Congress' return to unveil the proposed legislation, the Pentagon has sent draft bills to Capitol Hill. They will be ready for immediate transmission to the House and Senate Armed Services Committees when Congress reconvenes on 10 January.

Here is what each of the draft measures proposes:

"Tombstone" Promotions

Navy and Marine Corps officers who held "tombstone" promotions on the temporary disability retired list as of 1 November 1959, would be permitted to retain such rank upon permanent retirement if not otherwise entitled to the same or a higher grade under any other provision of law at the time of permanent retirement.

Under Secretary of the Navy Paul B. Fay, Jr., said there have been two instances of officers who were on the temporary disability retired list and who were temporarily retired with "tombstone" rank who have since been found fit for duty. Both were recalled to active duty, with their consent, and almost immediately (after from one to three days) re-retired. The officers were recalled to active duty in the grades they held before their "tombstone" advancement and, when permanently retired (after 1 November 1959, the date on which "tombstone" promotions were repealed) could not again be advanced to the higher rank.

Secretary Fay said there are still 121 officers on the temporary disability retired list who hold "tombstone" promotions and past experience has shown that about 10% ultimately will be found fit for duty. This would mean that about 12 more officers would lose their higher retired grade upon re-retirement.

Because the officers were not in a position to take advantage of the grace period (August 1959 to 1 November 1959) granted by Congress to officers on active duty, the Navy is seeking a reprieve for those on the temporary disability retired list.

Army-Air Force Retirement

Changed retirement rules for Regular commissioned officers of the Army and Air Force have been proposed by Secretary of the Air Force Eugene M. Zuckert.

At present, Regular officers of the two Services who face separation after twice failing to be selected for promotion or after being found disqualified for promotion, may be retained on active duty if they are within two years of retirement. But, operation of the law has made it necessary in some cases for the Services to retain the officers for periods exceeding two years.

The "inconsistency," Secretary Zuckert said, grew out of the "White Charger" legislation enacted by Congress in July 1960. Before that time, officers facing forced separation were retained on active duty if they were within two years of becoming entitled to retirement under any provision of law, and were retired as soon as they acquired entitlement under any provision of law.

An unintended and unanticipated result of the "White Charger" law, however, now makes it necessary to retain such officers until they complete 20 years of active commissioned service.

As an example of the operation and effect of the present law, Secretary Zuckert cited the case of an officer with a total of 19 years of active service, which includes five years of active enlisted service. After twice failing to be

selected for promotion this individual, under present law, would be retained for a period of six years until he completed 20 years of active commissioned service.

Under the proposed legislation, he would be retained for a period of only one year until he completed 20 years of active military service.

Secretary Zuckert said the prohibition against counting active enlisted service when computing the retirement date of twice-failed or disqualified officers "was inadvertently established and, in part, negates the basic intent of the law."

The prohibition would be eliminated by enactment of the new proposal.

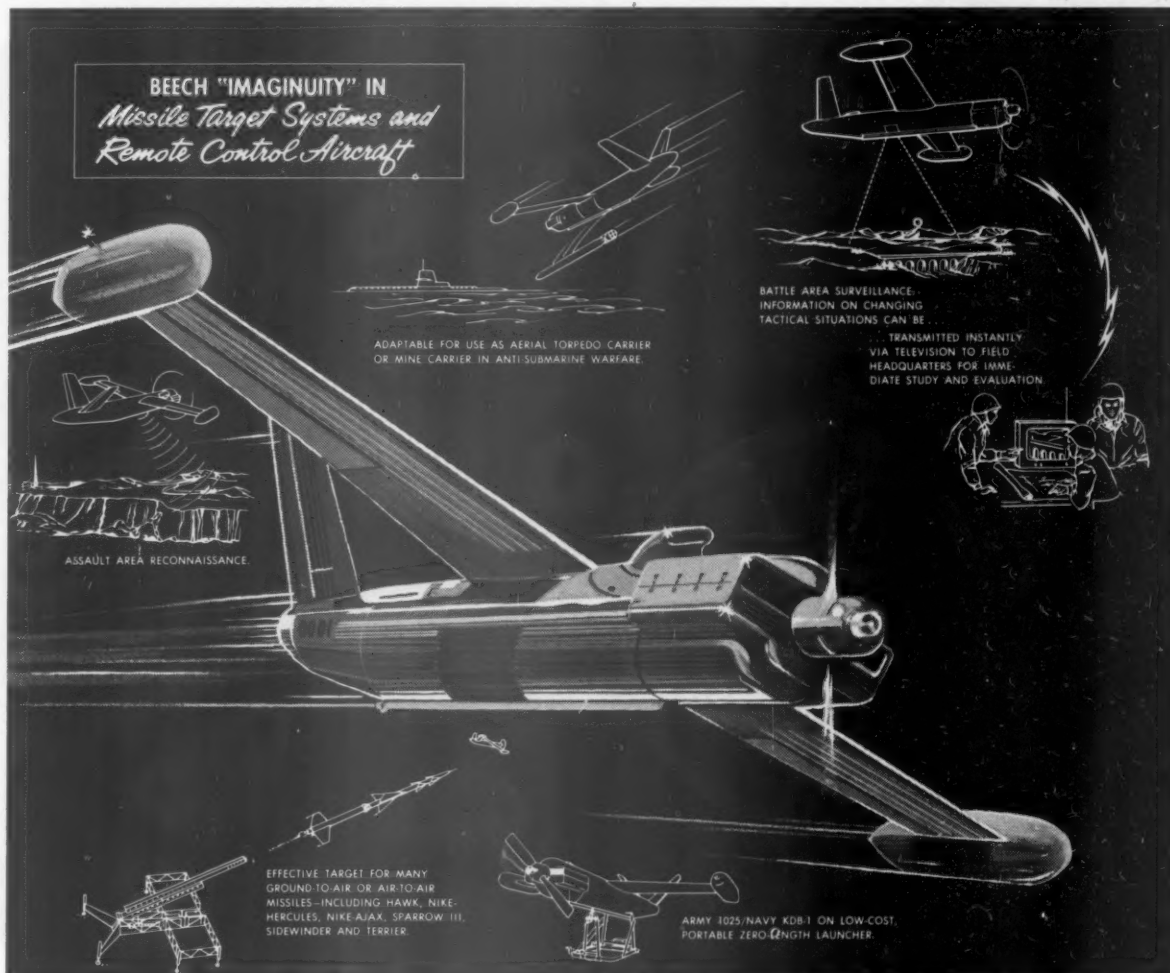

Navy Nurse Corps

Another Navy proposal sent to Capitol Hill by Under Secretary Fay would insure, for the purpose of voluntary retirement, that all officers of the Navy Nurse Corps would receive credit for prior active enlisted service. Additionally, the proposal would insure that all Navy Nurses and officers of the Medical Service Corps would receive credit as

commissioned service for all active service performed as a nurse prior to 16 April 1947.

Under present law, for the purpose of voluntary retirement Navy officers must have completed 20 years of active service of which at least 10 must be service as a commissioned officer. Years of "active service" are computed by adding all active service in the Armed Forces. Years of service "as a commissioned officer" are computed by adding all active service in the Armed Forces

Beech radio-controlled Army 1025 and Navy KDB-1...

Low-cost operational missile target of proven reliability, adaptable to many requirements

Designed to meet advanced weapon systems training and evaluation requirements, the Beech Army 1025/Navy KDB-1 has already demonstrated its reliability in a wide variety of missions. In addition, it can be easily adapted, at low cost, to perform other missions in the fields of reconnaissance, BCR and anti-submarine warfare. With a top speed of 300 knots, it can fly

at altitudes in excess of 40,000 feet and can carry interior payloads of up to 200 pounds and up to 4 cubic feet.

Already operational and simple to use, the 1025/KDB-1 can be supplied rapidly to field commanders and can be operated by relatively unskilled people. All equipment and tools required for ground support are fully developed, available and ready for use.

Pentagon Legislative Plans Revealed; SecDef Wants Promotion Change

From first page—

package. The Pentagon won Congressional approval this year for an emergency pay plan for such dependents. The new proposal will permit the Services to authorize "the advance return" of military families and household goods from overseas to U. S. locations "when such return is determined to be in the best interests of the individual and the government."

Here is the full legislative program as outlined by Secretary McNamara, who said studies still are underway "as to the need for legislation in a few additional areas."

PART I—PRESIDENT'S PROGRAM PROPOSALS

1. DOD 87-142, **Military Construction Authorization Act, 1962**—To provide authorization for construction at military installations within the United States and abroad.

Status: Under preparation within the Department of Defense.

Cost and Budget Data: Unavailable pending determination of requirements.

2. DOD 87-143, **Procurement of aircraft, missiles, and naval vessels during fiscal year 1963.**

Status: Under preparation within the Department of Defense.

Cost and Budget Data: Unavailable pending determination as to the program.

3. DOD 87-144, **Officer Personnel Act Amendments**—To implement the recommendations of the Department of Defense Ad Hoc Committee to Study and Revise the Officer Personnel Act.

Status: Legislation is being drafted to implement the recommendations of the Committee. The proposal will be referred to the Bureau of the Budget shortly for clearance.

Cost and Budget Data: Enactment of this legislation is not expected to result in increased budgetary requirements.

PART II—OTHER PROPOSALS SPONSORED BY THE DEPARTMENT OF DEFENSE

A. PRIORITY ITEMS

1. DOD 87-9, **Per diem increase for members of the uniformed services.** This proposal would increase the maximum per diem allowance for military personnel from \$12 to \$16 and authorize reimbursement for actual expenses incident to travel up to \$30 where the maximum per diem does not equitably compensate the individual due to unusual requirements of the assignment. Enactment of this proposal would authorize for military personnel the same per diem rate authorized for civilian personnel pursuant to P. L. 87-139.

Status: H.R. 7723 has passed the House and is pending on the Senate calendar.

In Mercury Control Center room at Cape Canaveral, designed under supervision of Bell Telephone Laboratories, NASA flight controllers make all vital decisions concerning a Mercury mission. Large map displays equipment status at tracking and communications sites, preferred recovery areas, the position of the capsule and its "immediate impact point."

Bell System manages building of global communications network for Mercury spacecraft

On September 13, National Aeronautics and Space Administration first achieved the orbital flight of an unmanned Mercury spacecraft, using a new worldwide communications and tracking network.

Soon, will come manned orbital flight.

The Bell System has played a large role in the development of this scientific project.

Western Electric headed an industrial team, on which Bell Telephone Laboratories also played an important part, in building the world-wide network of tracking and monitoring stations.

This 60,000-mile communications route, the bulk

of which is teletypewriter and telephone circuits, ties together 17 tracking and instrumentation sites with the Goddard Space Flight Center in Greenbelt, Md., and the Cape Canaveral Mercury Control Center.

As a Mercury capsule orbits over the area covered by each site, the far-reaching communications network immediately begins feeding information received from the capsule with clockwork precision. So fast and efficient is this communications system, it takes only seconds for data to start flowing from any site through Goddard to Canaveral!

The Bell System is proud to have contributed its creativity and resources to this vital project and to the further advancement of global communications.

862 Package Urges Reserve Readjustment And Accrual Flight Pay

Cost and Budget Data: It is estimated the annual cost increase resulting from the enactment of this legislation would approximate \$36,620,000.

2. DOD 87-16, **Representation of civilian employees and dependents before foreign tribunals.** The purpose of this legislation is to authorize the Secretary of the service concerned to employ counsel and to pay counsel fees, court costs, bail, and other expenses incident to representation before judicial tribunals and administrative agencies of a foreign nation, of certain persons attached to or associated with the armed forces overseas.

Status: H.R. 4322 has passed the House and is pending before the Senate Armed Services Committee.

Cost and Budget Data: Enactment of this legislation would not result in any increase in budgetary requirements of the Department of Defense.

3. DOD 87-19, **Readjustment payments for reserve personnel.** The legislation would equalize payments to reservists upon their involuntary release to inactive duty with payments received by regulars who are involuntarily separated.

Status: H.R. 8773 has passed the House and been reported by the Senate Armed Services Committee.

Cost and Budget Data: Enactment of this legislation is expected to result in increased annual expenditures of approximately \$85 million for the next three fiscal years.

4. DOD 87-21, **Flight Pay Accrual.** The proposal would authorize the payment of an accrued portion of flight pay to certain aeronautically rated or designated officers who have been eligible to receive such pay for a minimum of 10 years and who subsequently are removed from such status.

Status: H.R. 7651 has passed the House and is pending before the Senate Armed Services Committee.

Cost and Budget Data: Enactment of this legislation is expected to result in a substantial savings to the Department of Defense approximating \$24 million in the first year.

5. DOD 87-30, **Indemnification of Defense contractors.**

Status: The proposed legislation was submitted to the Congress in January, 1961, and referred to the Armed Services Committee. However, the proposal was not introduced on either side during the 1st Session.

Cost and Budget Data: Enactment of the proposal would result in no immediate increase in budgetary requirements. However, in the event of a disaster with respect to which indemnification was granted, additional funds would probably be required.

6. DOD 87-40, **Surplus Property Dona-**

tion—To limit Department of Defense allocation of surplus property to those educational institutions conducting satisfactory military training programs and to place the administering of requests for surplus property from such organizations as the Boy Scouts, Girl Scouts, Camp Fire Girls, and Boys' Clubs of America in the Department of Health, Education, and Welfare.

Status: H.R. 5956 and S. 542 are pending before the Government Operations Committee.

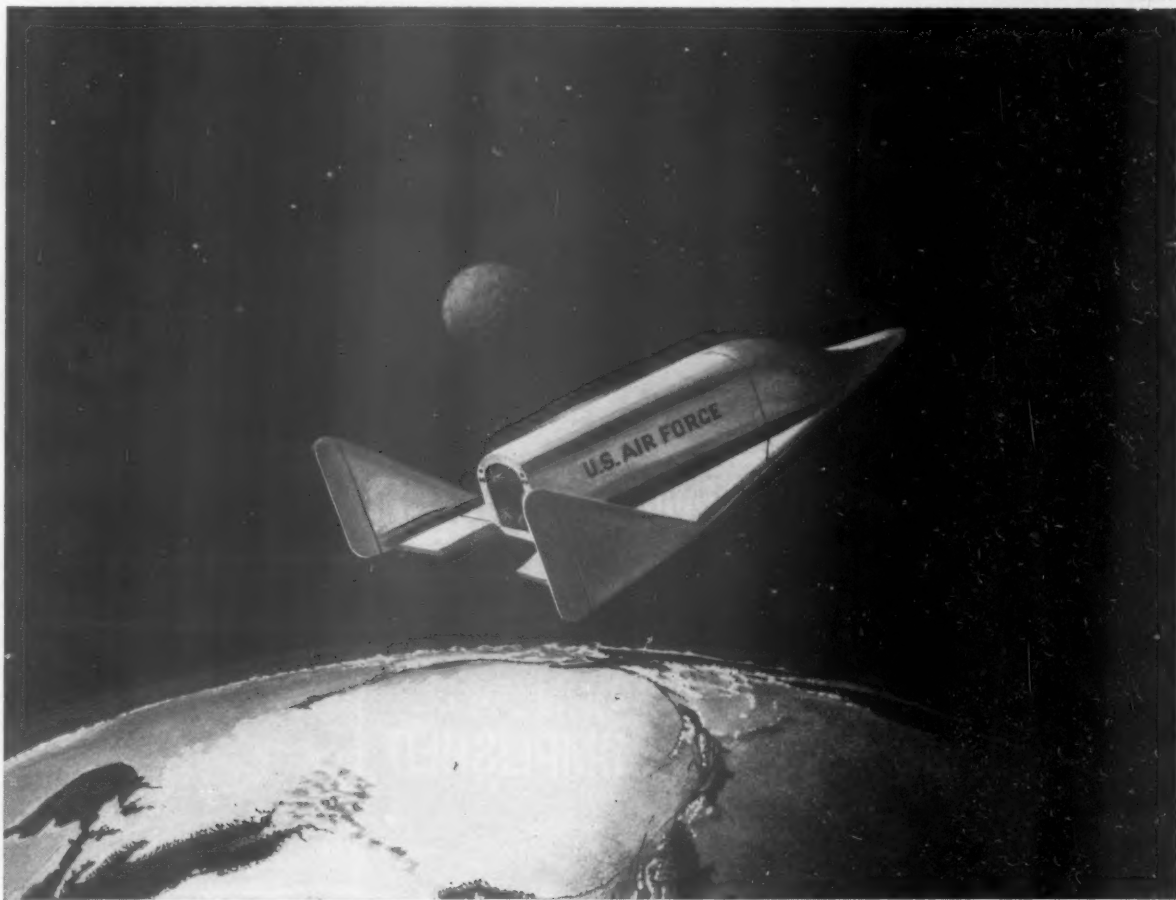

Cost and Budget Data: Enactment would result in no increase in budgetary requirements.

7. DOD 87-56, **Veterans' benefits for persons killed or wounded other than during periods of declared war.** The proposed legislation extends to servicemen who are injured outside the United States by hostile, war-like acts, the major identical benefits now available to veterans of World War II and the Korean conflict.

Status: The proposal was submitted to the Bureau of the Budget for clearance on December 15, 1960.

Cost and Budget Data: Since the administration of the benefits involved would be the responsibility of the

BOEING

Academy Strength Bill Proposed; Retired Pay Change In "Priority"

From page 5—

Veterans' Administration. enactment would result in no increase in the budgetary requirements of the Department of Defense.

8. DOD 87-60, Transportation Systems, Emergency Control.—To authorize the President to take possession and assume control of transportation systems in time of national emergency. The proposal would extend to periods of national emergency the authority now vested in the President in time of war.

Status: Awaiting Bureau of the Budget clearance.

Cost and Budget Data: Indeterminate.

9. DOD 87-79, Cadet overstrength of Military and Air Academies. The purpose of the legislation is to authorize an annual temporary over-strength in the number of cadets at the Military and Air Force Academies to insure that the cadet strength would be at the level authorized by law at the end of the academic year just prior to graduation. It would also increase to 40 the number of students authorized at each of the three academies from friendly foreign nations.

Status: H.R. 7913 has passed the House and is pending before the Senate Armed Services Committee. However, the bill

as passed makes no provision for the admission of cadets from foreign nations.

Cost and Budget Data: Enactment of the proposal would not result in increased budgetary requirements.

10. DOD 87-83, Recomputation of retired pay. The proposal provides that those persons entitled to retired pay or retainer pay under the Career Compensation Act of 1949 who were prohibited from computing their retired pay or retainer pay under the rates provided by the Career Incentive Act of 1958, shall be entitled to recompute their retired or retainer pay on the rates of basic pay provided by the 1958 Act.

Status: The legislation has been introduced as S. 626 and H.R. 4331 and is pending before the Armed Services Committees.

Cost and Budget Data: It is estimated that enactment of this legislation would result in increased budgetary requirements to the Department of Defense of approximately \$30 million for each of the next three fiscal years.

11. DOD 87-86, Transportation of deceased dependents from Alaska or Hawaii.—To restore the authority in the armed forces to prepare the remains, on a reimbursable basis, of deceased dependents of military personnel who die while residing with military sponsors on duty in Alaska or Hawaii and to transport the remains at Government expense to their homes or other appropriate place of interment. Enactment of this legislation is necessary due to the enactment of statehood legislation for Alaska and Hawaii.

Status: H.R. 7935 has passed the House and is pending before the Senate Armed Services Committee.

Cost and Budget Data: Enactment of the legislation would not increase the budgetary requirements of the Department of Defense.

12. DOD 87-100, Hawaii Land Transactions.—To authorize the disposal of certain real property at military installations in Hawaii and the use of the proceeds therefrom for the relocation or replacement on lands of lesser value.

Status: The proposal was submitted to the Bureau of the Budget for clearance by letter dated September 22, 1961.

Cost and Budget Data: It is estimated that enactment of this legislation would result in additional revenue accruing to the Treasury.

B. ALL OTHER DEPARTMENT OF DEFENSE LEGISLATIVE PROGRAM PROPOSALS

1. DOD 87-1, Industrial Mobilization Reserve Facilities. The proposal would clarify and make uniform and permanent the present temporary authority of the military departments in the field of industrial mobilization, procurement, and production.

Status: Proposal is awaiting Bureau of the Budget clearance for transmittal to Congress.

Cost and Budget Data: Inasmuch as the proposed legislation essentially continues in effect existing authorities and activities, additional budgetary requirements are not anticipated.

2. DOD 87-2, Judge Advocate General's School Degrees.—To authorize the Commandant of the Judge Advocate General's School to award a Degree of Master of Laws in Military Law.

Status: Awaiting clearance of the Bureau of the Budget.

Cost and Budget Data: Enactment would cause no increase in budgetary requirements of the Department of Defense.

3. DOD 87-4, Alaska Communication Systems Sale. The proposal would authorize the Secretary of Defense to convey, for adequate consideration, any element of ownership of any or all facilities or property included in government owned long-lines communication facilities in and to Alaska.

Status: Transmitted to the Congress in January and referred to the Armed Services Committees.

Cost and Budget Data: The estimated cost to the Government for the total facilities involved was, on July 1, 1959, approximately \$140 million. Adequate considerations for the facilities to be transferred can only be determined after an impartial, independent appraisal and subsequent negotiation.

Col. Warren Heads Troops

Col. Shields M. Warren, Jr., Commandant of the Ft. Ord, Calif., 3d Brigade since July 1960, has been assigned to command Special Troops there.

He was succeeded as brigade commander by Col. John C. Barney, Jr.

Bell's proven production leadership has provided helicopters of greater reliability, dependability and economy. And consistent achievement of schedules, contract prices and mission-suitability has kept Bell a part of the Army's tactical helicopter plan. The Army's superior front-line aviation capabilities are evidence of this successful Army-industry relationship.

4. DOD 87-5, Foreign Contracts, Exemption from Examination of Records Clause. The proposal would authorize the omission of an examination of records clause in certain contracts with foreign contractors if the agency head determines the omission will serve the best interests of the United States.

Status: H.R. 5163 is pending before the House Armed Services Committee.

Cost and Budget Data: Enactment would cause no increase in budgetary requirements.

5. DOD 87-6, Pay of Academy Professors—To increase pay of certain permanent professors at the United States Military and Air Force Academies.

Status: H.R. 4325 has passed the House and is pending in the Senate Armed Services Committee.

Cost and Budget Data: Enactment of this proposal would result in no increase in budgetary requirements.

6. DOD 87-8, Computation of Retired Pay for Certain Enlisted Members. This proposal would validate certain retirement payments which were made to a number of enlisted personnel of the Army and Air Force who retired prior to June 1, 1958.

Status: H.R. 4330 has passed the House and is pending in the Senate Armed Services Committee.

Cost and Budget Data: Enactment would result in an increase in budgetary requirements.

7. DOD 87-25, Gulf Test Range Land Withdrawal—To restrict the utilization of land and waters of the Outer Continental Shelf adjacent to the State of Florida to defense use.

Status: Awaiting clearance of the Bureau of the Budget.

Cost and Budget Data: No increase in budgetary requirements since the area involved is currently being used for Department of Defense purposes.

8. DOD 87-26, Matagorda Water Range, Restriction to Defense Use—To restrict the use of lands and water of the Outer Continental Shelf adjacent to the State of Texas known as the Matagorda Water Range and involving a land and water area of approximately 1,803,000 acres, which is used by the Air Force for aerial gunnery training.

Status: H.R. 6745 and S. 1493 are pending before the Interior and Insular Affairs Committees.

Cost and Budget Data: Enactment would result in no increase in budgetary requirements.

9. DOD 87-28, Emergency sale of goods and services to the owner of an aircraft or his agent—To authorize the Secretary of a military department to sell supplies or services to the owner of an aircraft or his agent when in an emergency it is necessary to enable an aircraft to proceed or when in the best interests of the United States.

Status: H.R. 7728 has passed the House and is pending before the Senate Armed Services Committee.

Cost and Budget Data: Enactment would result in no increase in budgetary requirements.

No. 10 DOD 87-29, Uniform Code of Military Justice Amendments. The proposal is designed to eliminate some of the procedural difficulties and delays which have arisen under the Uniform Code since its enactment and to provide

for more prompt and efficient administration of military justice.

Status: This proposal is pending before the Armed Services Committee.

Cost and Budget Data: Enactment would result in no increase in budgetary requirements.

11. DOD 87-34, To permit members of the armed forces to accept fellowships, scholarships, or grants. The legislation would permit qualified members of the armed forces to accept from non-governmental sources, competitive scholarships, fellowships, or grants proffered by educational institutions and foundations.

Status: H.R. 7727 has passed the House and is pending before the Senate Judiciary Committee.

Cost and Budget Data: Enactment would result in no increased cost to the United States.

12. DOD 87-36, Disposal of telephone facilities by negotiated sale. The proposal would authorize the sale of telephone facilities for not less than fair market value where it is determined that continued government ownership is not essential to the national security.

Status: H.R. 7720 is pending before the House Armed Services Committee.

Cost and Budget Data: An indeterminate saving to the government is expected to result from the enactment of this proposal.

13. DOD 87-37, Claims caused by military personnel or civilian employees outside the scope of their employment. This proposal would authorize the settlement of claims up to \$1,000 incident to the use of government property including government vehicles by military personnel and civilian employees outside the scope of their employment.

Status: H.R. 310 has passed the House and is pending before the Senate Judiciary Committee.

Cost and Budget Data: Enactment would result in no increase in budgetary requirements.

14. DOD 87-38, Supplemental codification of laws relating to the Department of Defense to bring titles 10 and 32 of the United States Code up to date by incorporating laws which became effective after December 31, 1957, and for other purposes.

Status: H.R. 2597 is pending before the House Judiciary Committee.

Cost and Budget Data: Enactment would result in no increase in budgetary requirements of the Department of Defense.

15. DOD 87-42, Naval Postgraduate School Dean's Compensation—To provide that the Secretary of the Navy shall prescribe the compensation of the Academic Dean of the Naval Postgraduate School.

Status: H.R. 4326 has passed the House and is pending before the Senate Armed Services Committee.

Cost and Budget Data: Enactment would result in no increase in budgetary requirements.

16. DOD 87-46, Luke-Williams Air Force Range Land Withdrawal—To provide for the withdrawal and reservation for the Departments of the Navy and Air Force at the Luke-Williams Air Force Range, Arizona.

Status: H.R. 3507 has passed the House and is pending before the Senate Interior and Insular Affairs Committee.

Cost and Budget Data: Enactment would result in no increase in budgetary requirements.

17. DOD 87-49, Establish a Judge Advocate General's Corps in the Navy.

Status: H.R. 6889 is pending before the House Armed Services Committee.

Cost and Budget Data: Enactment would not result in increased budgetary requirements.

18. DOD 87-50, Advance return of dependents and household goods of military

members from overseas—To authorize the advance return of dependents and household goods of military members from overseas to locations in the United States when such return is determined to be in the best interests of the individual and the government.

Status: Under preparation for transmittal to the Bureau of the Budget.

Cost and Budget Data: Enactment would result in no increase in budgetary requirements.

19. DOD 87-57, Military Correctional Facilities Administration—To make uniform the provisions of law governing

TENTH OF A SERIES INTRODUCING

"Your GPM man"

Robert D. Collegeman
Washington, D. C.

Richard C. Hirsch
Orlando, Florida

Ralph S. Paxman
San Antonio, Texas

Frank J. Grady
Denver, Colorado

Orville D. Kellett
Memphis, Tennessee

Robert F. Bantel
Charleston, South Carolina

GPM is proud of its 3-way growth . . . in size . . . in strength . . . and in service to policyholders. We like to feel that our policy of growing through sound and conservative insurance practices and management and never-ending search for better ways to serve will reflect in an even greater growth in the years to come. But, the most important factor in our company is the representative who serves you. "He's a GPM man" means to us and you, a man who is qualified by experience and training to serve you better. A GPM man is a specialist in military insurance problems. He has the personal background and the individual training to advise how best you can get the protection and savings plan that fits your personal need — call him — you'll be glad you did!

G P M representatives are our friends
— and yours too.

SecDef Discloses Plans To Change Retirement Eligibility Laws

From page 7—

the administration of military correctional facilities and the treatment of persons convicted under the Uniform Code of Military Justice.

Status: Awaiting clearance of the Bureau of the Budget.

Cost and Budget Data: Enactment would result in no increase in budgetary requirements.

20. DOD 87-63, **Disposition of insane persons in overseas areas**—To authorize psychotic United States nationals in government medical facilities and to evacuate overseas commanders to commit certain such persons involuntarily to the United States.

Status: Comments received from the Bureau of the Budget being considered within the Department of Defense.

Cost and Budget Data: Enactment would result in no increase in budgetary requirements.

21. DOD 87-64, **Validation of Armed Forces Leave Act Payments**—To validate payments of accrued leave to personnel ordered to their homes prior to April 1, 1953, pending retirement or separation from the services for physical disability.

Status: This proposal was transmitted to the Congress on March 20, 1961, and referred to the Armed Services Committees.

Cost and Budget Data: Enactment would result in no increase in budgetary requirements.

22. DOD 87-65, **To provide transportation of household goods and effects of civilian employees.** The proposal would authorize the transportation of household goods and effects of civilian employees of the Department of Defense in lieu of reimbursement.

Status: Awaiting Bureau of the Budget clearance.

Cost and Budget Data: Enactment would not result in any increase in budgetary requirements.

23. DOD 87-71, **Corpus Christi Offshore Warning Area Withdrawal**—To restrict the utilization of lands and waters of the Outer Continental Shelf included in the Corpus Christi Offshore Warning Area used by the Navy for air-to-air weapons firing and for transition from sub-sonic to super sonic flights.

Status: H.R. 6849 is pending before the House Interior and Insular Affairs Committee.

Cost and Budget Data: Enactment would result in no increase in budgetary requirements of the Department of Defense.

24. DOD 87-73, **National Industrial Reserve Act Amendments.** The proposal would expand the national industrial equipment reserve to provide capability essential for the survival of the civilian population and the restoration of essential civilian production. The present reserve is intended to provide tools needed for the restoration of military production facilities only.

Status: Awaiting Bureau of the Budget clearance.

Cost and Budget Data: Enactment would probably result in increased costs to the General Services Administration for the storage and maintenance of additional quantities of reserve equipment.

25. DOD 87-75, **Transportation of overseas civilian employees**—To authorize the sharing, between the two agencies concerned, of the transportation costs involved in the transfer from one agency

to another, of civilian employees serving outside the continental United States, and for other purposes.

Status: Awaiting Bureau of the Budget clearance.

Cost and Budget Data: No increase in budgetary requirements.

26. DOD 87-76, **Firefighters' Compensation**—To authorize firefighters who are being paid at a saved pay rate to elect conversion to the annual premium rate of pay.

Status: H.R. 8565 has passed the House and is pending before the Senate Post Office and Civil Service Committee.

Cost and Budget Data: Enactment would not result in increase in budgetary requirements.

27. DOD 87-77, **Instruction of civilian employees at the Naval Postgraduate School.**

Status: Awaiting Bureau of the Budget clearance.

Cost and Budget Data: No increase in budgetary requirements.

28. DOD 87-80, **Entitlement date of reservists to retired pay**—To entitle reservists to retired pay when they become eligible and have applied therefor rather than the first day of the next succeeding month.

Status: Transmitted to the Congress on September 30, 1961.

Cost and Budget Data: No increase in budgetary requirements.

29. DOD 87-84, **Codification of Title 37, United States Code, entitled, "Pay and Allowances of the Uniformed Services."**

Status: H.R. 6700 pending before the House Judiciary Committee.

Cost and Budget Data: No increase in budgetary requirements.

30. DOD 87-90, **Commissioned and Warrant Officers' Retirement Grade**—To preclude, with certain exceptions, commissioned officers and warrant officers from retiring in a grade higher than they served on active duty for a minimum of six months.

Status: Awaiting Bureau of the Budget clearance.

Cost and Budget Data: No increase in budgetary requirements.

31. DOD 87-95, **Discharge of Minors Who Enlist in the Naval Service or Coast Guard.** Proposal would require the discharge of any minor on proper application therefor if he enlisted without parental consent when under 18 years of age.

Status: Transmitted to the Congress

AF Tells Short Story Rules

The 11th annual USAF Short Story Contest will take place this spring, with judging at the installation level slated for no later than 30 May. Judging will be completed at the major command level by 15 August, with final submission to Headquarters USAF by 31 August.

To be eligible for submission, stories must be under 6,000 words and be an original unpublished work not previously submitted to the contest. Details on the contest are contained in AFL 34-14, 27 October 1961.

AF's Project Shakedown Could Help Other Services With Aircraft Components

PROJECT Shakedown, a four-month detailed study of the stock numbers for more than 46,000 aircraft engine fuel systems components, has begun at Kelly AFB, Tex., Col. Hall F. Smith, Chief of the San Antonio Air Materiel Area Services Division, Materiel Management Directorate, said the study is aimed at making best use of all excess materiel and equipment no longer needed by one agency which can be used by another military service. Common identification of equipment is expected to result.

James D. Eldred, San Antonio AMA Chairman of the steering committee at Kelly, will be aided by Army, Navy and Air Force Logistics Command representatives.

Wherever like items occur within the four services, the group will select the best parts to remain in the inventory. Thus, all agencies will receive maximum benefit in use of engine fuel systems components used on 24 engines common to the services.

AIR FORCE ORDERS:

B/G Crow Leads Strategic Missile Wing; NATO Defense College Post To B/G Coulter

Eugene M. Zuckert—Secretary of the Air Force
Joseph V. Charyk—Under Secretary of the Air Force
Joseph S. Imrie—Assistant Secretary (Material)
—Assistant Secretary (Financial Management)
Brockway McMillan—Assistant Secretary (Research & Development)
General Curtis E. Le May—Chief of Staff

GENERAL OFFICERS—

Brigadier General

Crow, Roger M., Hq 1st Strat Aerospace Div, SAC, Vandenberg AFB, to Hq 392d Strat Msl Wg, SAC, Vandenberg AFB, for dy as Comdr.

Hutchison, John M., Comdr, 314th ADiv, Pac AF, APO 970, SF, asg add dy as Comdr, 6314th Spt Wg, PacAF, eff 20 Jul.

Jones, David M., Wright-Patterson AFB, is rel fr dy as VComdr, Aeronautical Sys Div, & asg dy as DepComdr, GAM-87 & Sys Program Dir, eff 20 Oct.

Active Units "Adopt" 2 USAFA Squadrons

Two more Air Force Academy cadet squadrons have been formally "adopted" by active duty Air Force units. The 18th and 22d Cadet squadrons received the colors and unit histories of the 56th Fighter Wing, K. I. Sawyer AFB, Mich., and the 363d Tactical Reconnaissance Wing of Shaw AFB, S. C., respectively.

At special informal ceremonies in the Arnold Hall (cadet social center) ballroom, Col. James S. Reed, 56th commander, made the colors presentation for his unit to the 18th Cadet Squadron commander, Cadet Lt. Col. Robert H. Baxter. The Air Officers Commanding the 18th Squadron, Lt. Cdr. Roderick B. Moore, USN, and Capt. Verle L. Johnston, USAF, were also present.

Col. Arthur A. McCarten, commander, represented the 363d Wing and presented the colors and unit history to Cadet Lt. Col. Roger S. Rhoades, the 22d Cadet Squadron commander.

Sponsorship is part of an Academy program whereby each of the 24 cadet squadrons is or will be adopted by an active Air Force combat unit.

Coulter, Theron, Ent AFB, to dy sta Det 1, SHAPE, APO 55, NY, for dy as Dep Comdt, NATO Def Coll, NLT 27 Nov.

Zoller, Virgil L., Cannon AFB, to Hq 4500th AB Wg, TAC, Langley AFB, w/dy sta Det 1, MacDill AFB, for dy as Dir, J-2, US Strike Comd, NLT 15 Nov.

LIEUTENANT COLONEL

Scott, Leonard B., Jr., Ent AFB, to Hq 32d ADiv, Okla City AFS.

MAJOR

Mouth, James H., WashDC, to Hq 1100th AB Wg, Hq Comd, USAF, Bolling AFB.
Ritter, Robert C., Hill AFB, to 3148th Ammunition Storg Sq, AFLC, APO 83, NY.

CAPTAIN

Locke, Jesse C., Jr., Ent AFB, to 68th Ftr Intep Sq, APO 929, SF.

HUSTLER PILOT HUSTLES TO DUTY

Maj. John C. Irving, a B-58 Hustler pilot with the 43d Bomb Wing at Carswell AFB, Tex., lives on the north shore of Fort Worth's Lake Worth. His duty station at Carswell is located on the lake's south shore.

Rather than buck two rush hours daily of heavy auto traffic to and from the base, Major Irving prefers to zip across the lake by speed boat. The short cut is approximately three miles long and takes about five minutes.

After securing his boat to a pier on the south side of the lake, Major Irving boards a bicycle for a two-mile junket to the flight line. Then, he takes off in the world's only supersonic bomber, the B-58 Hustler.

McMULLEN TROPHY

A new trophy to be awarded annually to the individual at the San Antonio Air Materiel Area, Kelly AFB, Tex., who submits the suggestion having the greatest value to the Air Force has been presented by Mrs. Adelaide L. McMullen, widow of Maj. Gen. Clements McMullen.

Mrs. McMullen made the presentation to Maj. Gen. W. T. Hudnell, SAAMA Commander, as a tribute to the memory of her husband, a former SAAMA Commander.

Brig. Gen. Dorr E. Newton, SAA MA Deputy Commander, will head a six-man board to make the final selection of the winning suggestion.

Manned Vehicles In Aerospace Forces

In the William Tell interceptor weapons meet concluded last week 137 aerial targets were shot down out of 142 shots fired. Lt. Gen. Robert M. Lee, head of the Air Defense Command, believes that while this is excellent against today's threat we must have Mach 3 to 6 interceptors to meet tomorrow's threat. (See Page 23)

General Bernard A. Schriever, head of the Air Force Systems Command, told a symposium at Hartford, Conn., last week (see page 11) that there will be a continuing need for strategic bombers, fighters, and transports in the years ahead.

Many other leaders have emphasized the need for maintaining and improving our inventory of manned aircraft. Congress, too, sees this defense need so much so that it added to the current Appropriations Act more than \$780 million for additional advanced models of long-range bombers, for carrying forward the B-70 Mach 3 bomber project, and for speeding up the Dyna-Soar program for a manned orbital space vehicle.

But the Administration has decided to impound these additional funds. Thus, the extra \$514.5 million for long-range bombers, the added \$180 million for the B-70, and the \$85.8 million for Dyna-Soar will not be spent, despite the "overwhelming" intent of Congress.

This means that the acquisition of operational models of the B-70 is shoved further off in the future while at the same time the advanced models of the B-52 and/or the B-58 which had been counted on to fill the gap will not be bought. Also the Dyna-Soar program will lack the impetus the additional funds would have provided toward the development of a manned aerospace system capable of conventional landing at pre-determined fields.

We believe these are backward steps. Instead of putting the brakes on development and purchase of manned systems, the Department should be initiating further development projects designed to keep us in the forefront in this field. As General Schriever said in his Hartford speech: "As far as we can see into the future, manned vehicles will be an indispensable part of our aerospace forces."

Where Is DoD's Promised Retirement Study?

Congress, and particularly the members of the Senate Armed Services Committee, will most certainly ask the Defense Department for the results of the reexamination of the entire military retirement system which Defense Secretary Robert S. McNamara told them last Spring he had initiated.

The Pentagon press office states (last week's JOURNAL page 21) that, while retirement is constantly under review, no special or specific study is under way.

In his earlier testimony on retirement before the Senate Committee (THE JOURNAL 20 May) Secretary McNamara said that he had ordered "a rather thorough study of it, but it is an extremely complex study and I am not prepared to discuss it." This is typical of the lack of attention which has been given by the Pentagon leadership to the problem of retired pay.

The House, which once passed the retired pay equalization bill, now looks to the Senate to take the initiative. Thus, if Chairman Russell of the Senate Committee should heed the demands of other Senators and start hearings on pay equalization, there will surely be a call for the promised Departmental study.

On the other hand, Senator John C. Stennis (D-Miss.) who has been favoring a contributory retirement system, also will want to see the results of the Departmental study.

The important question of what happened to the promised study has yet to be answered.

DoD Aims To Protect Services' Insured Drivers

The Defense Department's directive on motor vehicle liability insurance which now threatens to increase premiums (see story on first page) was originally formulated to protect Service automobile owners against misleading insurers. There were companies which had sold policies to young enlisted men at very low rates, but unfortunately, it turned out that these policies covered only accidents which occurred on the base—if they had an accident away from the base they were not covered.

Thus, the policy of assuring that only qualified insurance firms would be permitted to solicit business on military bases is a good one and should be enforced.

The weakness in the present Directive is that it places upon the insurance companies the responsibility for assuring the post or base commander that automobile owners on his base are covered by liability insurance. In case of lapses or failure to renew, the firm must promptly notify the base commander. With some 800 bases in the United States and hundreds of thousands of policies in force, it can be seen that this is a most costly process.

Why would it not be feasible for all commissioned and non-commissioned officers to be given the responsibility of keeping their commander informed of these matters? Certainly, this is a matter of personal honor, such as check cashing, which can be entrusted to the individual.

READERS' VIEWS

General Walker's Resignation

• **DUTY—HONOR—COUNTRY:** The Creed of West Point has provided the United States with the finest corps of military leaders in history. It has been doing this for over a century now—most notably during the Civil War when it inspired almost half of West Point's officers to support the southern political beliefs, at the expense of their careers in the Federal Army.

Our nation is now in the same type of internal struggle over the future direction it is to follow as it was during the Civil War and once again, some of West Point's leaders like Robert E. Lee and "Stonewall" Jackson before them are abandoning promising careers when their judgment on basic issues of individual responsibility differs with those in power in Washington, D.C.

Regardless of whether their judgment is right or wrong, the basic reason these men are resigning is unselfish devotion to their nation. When **DUTY** demands that a man do things he does not believe to be in the best interest of his **COUNTRY**, the only **HONORABLE** conduct for him to follow is to resign from the service and to do what he believes is right.

Such resignations, like that submitted most recently by General Walker, should reassure patriotic citizens that we do have military leaders who are intelligent, thinking men with the courage to reach their own decisions and the devotion to a creed, other than one of self-gain, to carry them out.

Any man less than this is not fit to lead our troops.

They Met Last Time On Beleaguered Corregidor

MAJ. Gen. William E. Eubank, Jr., Deputy Commander Second Air Force, Barksdale AFB, La., and RADM. Frederick Warder, Commandant Eighth Naval District, met last week at the Louisiana State Red Cross Conference for the second time in almost 20 years. The first time was on Corregidor.

They first met on the little Philippine island when the then Lieutenant Commander Warder, captain of the submarine Seawolf, was sent to evacuate approximately 25 Air Corps and Navy pilots—one of them then Captain Eubank.

Under the nose of the Japanese fleet, the Seawolf took the pilots to Java.

General Eubank was born in Welch, W. Va., located in the southwest corner of the state, and Admiral Warder was raised in Grafton, in the northcentral portion of the state.

IN THE JOURNAL

Gen. Shephard Will Be Marine Corps Commandant; Maine Explosion Studied; Canadian Frontier Security

10 Years Ago—Lt. Gen. Lemuel C. Shepard was named this week by President Truman to be the 20th Commandant of the U. S. Marine Corps. Now Commanding General of Fleet Marine Forces, Pacific, he will relieve General Clifton B. Cates as Commandant on 1 January.

50 Years Ago—A joint board was named on 10 November by Secretary Meyer to report on the condition of the wreck of the Maine. The board's instructions were general, it being authorized to report on the cause of the explosion.

98 Years Ago—The Governor-General of Canada has given notice through Lord Lyons to the Secretary of State of rebel plots hatched in the British provinces to deliver the prisoners on Johnson's Island in Lake Erie, and burn Buffalo and Ogdensburg. Adequate measures to defeat the enterprises have been promptly adopted, and Major-General Dix has been ordered to Buffalo to adopt measures for the security of the frontier.

General Schriever Surveys Developments In Manned Aircraft; Urges Mach 3 Bomber, New Tactical Fighter; Tells C-141 Importance

GENERAL Bernard A. Schriever, head of the Air Force Systems Command, has sounded a new call for a vigorous program for development and procurement of manned aircraft.

Widely acclaimed for his accomplishments in the missile and space field, General Schriever has declared:

"The Air Force must continue to maintain versatile, mixed forces that are capable of dealing with any threat in aerospace, on any scale—from local conflicts to general conflict. As far as we can see into the future, manned vehicles will be an indispensable part of our aerospace forces."

General Schriever recalled in an address to the Connecticut General Life Insurance Symposium at Hartford on 2 November that shortly after graduation from Texas A&M, he entered flight training "and in the next few years I did a lot of flying—as an officer in the peacetime Air Corps, as a civilian pilot for Northwest Airlines, as an Air Corps test pilot, and as a combat pilot in the Pacific during WWII."

Here is what General Schriever said to document his contention that "as far as we can see into the future, manned vehicles will be an indispensable part of our aerospace forces."

MANNED aircraft have a flexibility that is essential to the Air Force operations. In the years ahead there will be a continuing need for strategic bombers, fighters, and transports.

At present the Air Force has a supersonic bomber, the B-58 Hustler, but we see the need for a bomber capable of Mach 3 speeds, or about 2,000 miles per hour. This is the B-70, which is designed as a long-range, high speed aircraft that could be used in all levels of conflict. Unlike the ballistic missile, the B-70 may be launched under positive command control. That is, it could be sent aloft upon any indication of an enemy attack, but it could be recalled.

B-70 Plans

Our present program calls for the development of three prototype B-70's and a prototype bomb-navigation system. Our objectives in this program are to prove the technical feasibility and airworthiness of the air vehicle; to validate the aerodynamic and structural design; to demonstrate speed and altitude capability and range potential; and to establish the basic performance of the propulsion system.

The first test flight of the prototype B-70 is scheduled to take place in December of next year.

We also need an advanced tactical fighter, an aircraft that is indispensable to limited war operations and is valuable as part of the force structure for general war. Our projected fighter, the TFX, will need to be capable of short take-off and landing, an essential requirement in many parts of the world where surfaced runways are short or are nonexistent.

In the transport field, we have under development the C-141 all-jet cargo transport. It is now approaching the final design stage and will have its first flight late in 1963. By mid-1965, it will enter the operational inventory.

C-141 Is Versatile

The C-141 is being designed to meet the combined needs of the Department of Defense for military airlift—which means meeting requirements for specific wartime missions—and the needs of commercial air freight operators. As currently planned, the C-141 will be capable of transporting 69,300 pounds of payload across the Atlantic and 39,000 pounds across the Pacific. For domestic operations, it will be able to carry 80,000 pounds of payload from coast to coast at a cruising speed of 440 knots.

The transport will have its cargo floor at truck-bed height and will be designed for straight-in rear loading. Both of these features will provide for ease of loading with a minimum of ground handling equipment.

These aircraft are necessary to provide quick reaction with our military forces to threats which may arise in any part of the world. At the same time we are developing research vehicles to investigate the problems of flight in the higher reaches of the atmosphere.

One of these is the X-15 rocket-powered plane recently flown in a series of progressively higher and faster test flights. Last month it attained a height of nearly 41 miles and a speed of more than 3,900 miles per hour. The X-15 combines the characteristics of the aircraft with those of a true space vehicle. Within the atmosphere it is controlled aerodynamically, but in the rarified upper atmosphere it must be controlled by reaction jets, just as a satellite or space probe is controlled.

X-15 Aerospace Craft

The X-15, then, can be best designated an aerospace craft, since it is flexible enough to operate in both the atmosphere and space.

This experimental plane is preparing the way for a more advanced research vehicle, the Dyna-Soar. The Dyna-Soar is a manned space glider that will re-enter the atmosphere from space under control of its pilot, who will be able to maneuver it to a landing at a conventional air base. In other words, the Dyna-Soar will look and act like an airplane, in contrast to the Mercury capsule, which follows a ballistic path in re-entering the atmosphere.

We are developing all of these aircraft to meet potential military needs. But at the same time they promise many benefits to commercial air transportation in the future, just as military aviation has benefited civil aviation in the past.

During the 58 years of the Air Age, the urgent demands of wartime necessity have greatly stimulated the advance of science and engineering. This has been particularly noticeable in aviation and electronics.

Before World War I, the potential importance of the airplane was vastly underestimated. But the exploits of airmen over the battlefields of Europe caught the imagination of the public. At the same time the war encouraged a number of engineering advances in aviation.

WW II History Cited

World War II had a similar influence on the growth of aviation, and today a great many commercial aircraft derive from their military counterparts. In addition, almost all of the flight and engine instruments, and more than half of the secondary power equipment used on civilian aircraft, have come as a result of military research and development.

Today the need for continual advance in military aviation is as urgent as it was during the hectic days of World War II. For the global contest in which we are engaged today is the most serious one our nation has ever known. The Soviets are determined to dominate the world, and they will not hesitate to use any means they think necessary.

On the political, economic, and ideological fronts they are continually on the offensive, and the use of military threats is one of their standard tactics. Even the exploration of space has become a part of their campaign of terror. Recently the Soviet press boasted that rockets similar to those that orbited Major Gagarin and Major Titov could be used to carry 100-megaton bombs. At the same time the Soviets are carrying on localized military ad-

ventures on earth, such as their present activities in Laos and South Vietnam.

Therefore it is imperative that we maintain the aerospace strength to counter any threat the Soviets may direct against us. This fact underscores the necessity and importance of military aviation for the foreseeable future. But the money and effort we spend for military developments will also have important by-products for commercial aviation.

Let me mention a few of them.

First of all, I believe the C-141 all-jet transport may have great utility as a commercial aircraft.

Supersonic Transport

Secondly, military research and experience will continue to make vital contributions to the development of the commercial supersonic transport. B-58 and B-70 technology have established the technical feasibility of such an aircraft. The knowledge gained from work on these two supersonic bombers has reduced and will probably reduce further the time needed to develop the supersonic transport.

Contrary to what some people believe, the B-70 will not be the prototype of the commercial transport. There are some important differences, particularly in the powerplant and airframe, but the B-70 program will make valuable contributions in such areas as aerodynamics, stability, control, metallurgy, propulsion, electronics, navigation, and human factors.

The development of the supersonic transport is going to be an immense undertaking that will call for the closest cooperation between government and industry. A few months ago the three government agencies most closely concerned—the Federal Aviation Agency, the Department of Defense, and the National Aeronautics and Space Administration—made a joint report on the commercial supersonic transport aircraft. They agreed on a broad Federal research program in which the FAA would provide leadership and fiscal support; the Department of Defense, through the Air Force, would provide administrative and technical support; and NASA would provide basic research and technical support.

Avoid Duplication

Such cooperative effort will enable the government to use its existing resources and facilities without unnecessary duplication. This principle is valid for all national scientific and technical programs, and it will enable us to speed up our efforts, because the pacing factor in technical progress today is not technology. It is management.

My experience in developing the ballistic missile convinced me of this fact, since then I have encouraged the wider application of the management tech-

niques we learned at that time.

Besides the C-141 and contributions toward the supersonic transport, I believe that military aviation may provide additional benefits to commercial air transportation. The development of the new tactical fighter will provide much useful knowledge about short take-off and landing (STOL) aircraft, and such research vehicles as the X-15 and Dyna-Soar should make a number of direct and indirect contributions to civil aviation.

In short, I am convinced that military aviation still has much to contribute to commercial air transportation. The Soviet threat in aerospace is likely to continue for many years, and we in the military will have the continuing responsibility to produce new systems to meet that threat.

Civilian By-Products

Judging by the past, the advances in military manned systems should do more than deter attack; they can also yield important civilian by-products. Our primary mission is the defense of this country, but the experience, knowledge, techniques, and facilities we acquire in fulfilling that task can bring widespread peacetime benefits to all the people of our nation and ultimately—we hope—of the entire world.

This, I believe, is the promise of military developments in manned aircraft. In the past, the military has made significant contributions to the growth of aviation. I am firmly convinced that in the future we shall make contributions of equal importance to all of us.

Kincheloe Gets B-52H Col. Sowers Is C.O.

The 4239th Strategic Wing at Kincheloe AFB, Mich. is the latest SAC unit to receive the Boeing B-52H.

Col. Louis M. Sowers, Wing Commander, and Lt. Col. Doland F. Kasselman, 93d Bomb Squadron Commander, accepted the new eight-jet B-52H at the Boeing Company's Wichita, Kans., division for the non-stop flight to Kincheloe on Veterans Day.

The 488,000-pound B-52H boasts a number of dramatic refinements over earlier B-52 models, including capability to carry four long-range hypersonic Skybolt ballistic missiles when they become operational.

The B-52H is equipped with advanced capability radar for low-level bombing runs, turbofan engines for a substantial range improvement over earlier models, the deadly ASG-21 Gatling cannon capable of firing 20-millimeter rounds at the rate of 4,000 a minute and new electronic countermeasures for greater penetration of enemy areas.

MEMO--

NAVY SECRETARY JOHN B. CONNALLY, jr. must decide within the next 30 days whether or not he will respond to political pressure from his home state and run for Governor of Texas. If he decides to leave the Pentagon—and Navy people are hoping that he won't—the next Secretary of the Navy could be an Army colonel.

SECRETARY OF DEFENSE McNAMARA is known to be highly pleased with the job that has been done at the Pentagon by Assistant Secretary of the Navy (Installations and Logistics) Kenneth E. BeLieu. Colonel BeLieu, who will be 48 in February, is a '37 graduate of the University of Oregon. He won the Silver Star for heroism in Europe during WWII, and lost his left leg below the knee as a result of combat wounds in Korea.

ASSISTANT SECRETARY BELIEU remained on active duty after Korea and served as Executive Officer to Secretaries of the Army Robert T. Stevens and Wilber M. Brucker before joining the Senate Armed Services Committee professional staff in '55. In January '59, then Senator Lyndon Johnson tapped Colonel BeLieu, a graduate of the Harvard Business School Advanced Management Program, to be Staff Director of the Senate Committee on Aeronautical and Space Sciences and Staff Director of the Senate Preparedness Investigating Subcommittee.

IF SECRETARY CONNALLY DEPARTS from the Pentagon and returns to the political wars, Secretary McNamara will need to decide whether to go outside and pick a successor or promote from within the ranks. If the latter course is followed, it's an even bet that the retired Army colonel will get top consideration to lead the Navy.

SPENDING BILLIONS OF DOLLARS seemingly is not as attractive a task as some might think. Despite the fact that October and the first weeks of November are critical budget times, Secretary McNamara has found it difficult to obtain a replacement for AF Assistant Secretary (Financial Management) Lyle S. Garlock. The Navy also has no Assistant Secretary for Financial Management. Two possible explanations for these vacancies come to mind: (1) Secretary McNamara is having trouble finding qualified people to take these positions because the word is around that fiscal decisions are being concentrated to an increasing degree at the OSD level; or (2) there are some problems in obtaining "clearances" at the Democratic National Committee level.

THE ARMY JAG HAS LOST a decision. The Defense Department, desperate to find Pentagon space for its expanding activities, decreed that the Services must surrender space in the Big Shed. The vacate order fell first on the office of the Army Judge Advocate General. He was told to provide 40,000 square feet, and to shift activities to Wake Hall near the new D. C. Stadium. Other Service activities will get similar notices.

AIR DEFENSE COMMAND people are noting with pride the vigorous leadership their new Chief, Lt. Gen. Robert M. Lee, is providing. He is taking advantage of every possible opportunity (see Page 23) to stress the aerospace responsibilities of his command, and to urge development and procurement of weapon systems that will meet the challenges of new Soviet capabilities.

THE SELECTION WAS UNANIMOUS when the 17-member National executive committee of the Reserve Officers Association named the man who will receive the 1962 ROA Minuteman Award. Chairman Carl Vinson of the House Armed Services Committee will be honored as "the citizen who has contributed the most to national security."

SECRETARY McNAMARA has revealed that the Pentagon will press for action on the Bolté Promotion Plan in the forthcoming Congress. The Budget Bureau was advised 3 weeks ago that the Pentagon hoped a draft proposal would be ready "shortly." The legislation is still making the Pentagon rounds. The Services have until 15 November to review "technical language", after which the measure will be returned to Secretary McNamara for final scrutiny. Then, it will go to BoB for review and clearance.

THERE IS LITTLE INNOVATION in DoD's '62 legislative program (page one). Not counting the 2 annual authorization bills, 30 of the remaining 50 proposals already are before Congress; 9 have passed the House. Only 10 new personnel measures are included in the big package, although Secretary McNamara says the need for legislation "in a few additional areas" is still under study.

SERVICE FAMILIES HOPE that one of these "additional areas" will be the \$450 million quarters allowance increase urged last Spring by one of Secretary McNamara's task forces. The DoD pay group said the need to boost quarters allowances was more important than any other pay item then under study. The four other biggest money items in the pay package included the trailer allowance increase voted by Congress last session, the retirement equalization measure and the Reserve RIF-pay bill (both given "priority" status in the legislative package), and the expanded use of proficiency pay.

GREATER USE OF PROFICIENCY PAY is one step the Pentagon can take administratively. The basic law already is on the books. But Service people will wonder why the quarters allowance proposal was ignored, especially when it was listed at the top of the pay-study recommendations. The pay group noted that Armed Forces quarters allowance have been increased only about 14% since 1942, while the nationwide Price Index for rent rose 56.1% from 1942 to 1959.

A SAC SERGEANT will seek the world Judo championship in Paris next month. S/Sgt. George Harris, a Judo instructor at Travis AFB, Calif., has been sent to Japan to train for the international competition. He tied for fifth place in the '58 world meet, and captured the heavy-weight and overall titles at last April's National AAU meet. He's been AF champion for 4 years.

GENERAL CURTIS E. LeMAY, AF CofS, has been making it a strong point in recent addresses to stress that, although many people consider him a "bomber man," he began his flying career as a fighter pilot, and as R&D Deputy was in the forefront of pioneer work in the missile program. Now comes General Bernard A. Schriever (see Page 11), who declares: "To some people the fact that I am known as 'the Missile Man' means that I have lost my interest in the airplane. Nothing could be less true. I simply fight hard for the things I am responsible for," says the AFSC boss.

A LIGHT TOUCH WAS ADDED to the annual meeting of the Association of Military Surgeons by Royal Canadian Army Medical Corps Lt. Col. A. C. Hardman. Speaking on disaster planning in Canada, Colonel Hardman told of a friend who "remarked recently that if a Third World War ever comes, he would want to be in the department of Veterans Affairs early on—what an empire they could build with every inhabitant of our country a veteran!" Commenting on the fact that the 16 major cities of Canada have been designated potential atomic targets, he noted that "in our country, the selection of a city as a potential target has become a status symbol, like having a swimming pool or three-car garage. Some municipal authorities look forward eagerly to the day when their population growth will enable them to join this select circle."

IT REMAINS TO BE SEEN whether Secretary of the Army Elvis J. Stahr, jr., will be given the privilege of announcing officially the details of the Army Reorganization, or whether this will be done by Secretary of Defense McNamara or the President. It is recalled that the Army's decision to abandon the Pentomic structure of its infantry divisions, introduced during the tenure as CofS of General Maxwell D. Taylor, USA-Ret., Military Representative to the President, was announced first by the White House.

THE SERVICES ARE HOPEFUL, but not at all confident, that DoD and the Budget Bureau will support their appeals for action to obtain approval from the Senate Armed Services Committee for appointment of additional generals and admirals. As the situation now stands, the Services are unable to fill star billets that have been authorized by the House and Senate. The buildup has aggravated the problem, particularly since a number of Reserve and National Guard general officers have been summoned to Federal service.

THE STENNIS SUBCOMMITTEE inquiry into alleged "muzzling" of military officers will give considerable attention to the DoD Office of Public Affairs. First, of course, the Senators will want to learn additional details concerning "policy censorship" of speeches since last January. On top of this, questions will be asked regarding the public release of information concerning the case of Maj. Gen. Edwin A. Walker.

SOURCES CLOSE TO SENATOR Strom Thurmond (D-SC), a major general in the Army Reserve, say that although he recognizes that the Walker case has received the most prominent attention, the Senator is more perturbed about numerous cases reported to him in which Service people are said to have been "gagged."

IT'S NOTEWORTHY in connection with current difficulties that General Taylor, perhaps mindful of the fact that the Eisenhower Administration, had declined to approve publication—on "policy" grounds of a book by General Thomas S. Power, SAC CinC, did not submit for clearance his widely read book, "The Uncertain Trumpet."

STRIKE COMMAND J-2 will be Brig. Gen. Virgil M. Zoller, USAF. He has been Commander of TAC's 832d Air Division at Cannon AFB, N. M. General Zoller will serve under General Paul D. Adams, USA.

THE ARMY'S EXPERIMENT with automatic data processing at Ft. Meade, Md., soon will be abandoned. A pilot project for possible extension to the other Army installations, the ADPS equipment was used to regulate almost everything at Meade, including financial, personnel and logistics functions. It didn't work. Army officials expect to replace it with a less ambitious system.

DANIEL WEBSTER will be the name of the Polaris submarine, SSB(N) 626, which will be commissioned in January '64 at the Electric Boat Division, General Dynamics Corporation, Groton, Conn. She will be launched 1 April '63. Born in 1982 in Salisbury, N. H., the famed orator served in both the Senate and House of Representatives.

CIVIL DEFENSE emphasis in communities across the Nation will create a considerable number of new job opportunities for retired Service people. Many additional communities will seek to provide budget resources for full time civil defense directors.

COL. ELIZABETH RAY, UAF Director, has been named Oklahoma's outstanding State Woman by the Oklahoma University Chapter of Theta Sigma Phi, national professional fraternity for women in journalism. A graduate of the Oklahoma University School of Journalism in 1934, she was a reporter and city editor of the Anadarko, Oklahoma Daily News. She joined the Service in '42.

Army Reorganization Near

From first page—

altered at this time.

It must be emphasized that the proposals advanced by the Hoelscher Committee and its successor, the Traub Committee, under Lt. Gen. David W. Traub, Army Comptroller, and the final report by Secretary Stahr to Secretary McNamara still are subject to last-minute change.

But barring a major reversal of top-echelon thinking, the responsibilities of the Army's Technical Service chiefs will be truncated.

These responsibilities will be assigned to the new Research and Materiel Command, which will have charge of all Army R&D, Testing, Supply, Procurement, and Logistics. The likelihood is that this will be a four-star command.

The new Defense Supply Agency has been assigned headquarters at Cameron Station, Va. The prospects are that the new Army R&M Command will be moved to Ft. Meade, Md., about 25 miles from the Pentagon, mid-way between Washington and Baltimore.

Ft. Meade is now the home of the Second Army Headquarters and the National Security Agency. Presumably, a new home must be found for the Second Army.

The Combat Developments Command will be charged with future Army planning and doctrine. Its responsibilities will include some activities now at CONARC and the Combat Developments Experimentation Center at Ft. Ord, Calif.

The Hoelscher Committee recognized previous recommendations to combine the Army National Guard and the Army Reserve into one Reserve Force. It took no stand on this long-discussed and highly controversial matter.

B/G Dany Of MATS Receives Legion Of Merit

BRIG. GEN. George B. Dany, MATS Deputy CofS for Operations, receives the third Legion of Merit from Lt. Gen. Joe W. Kelly, MATS Commander. He was cited for his contributions to the successful accomplishment of major air-lift operations and increased US prestige while commander of MATS' 1605th Air Base Wing and the United States Forces, Azores. Before being assigned to MATS headquarters in August, the general received the Portuguese government's Distinguished Service Medal the first American ever to get the award.

WHERE WOULD YOU LIKE TO LIVE?

Major company has openings in most areas of U. S. for men of executive ability. If you are an officer, regular or reservist, and are looking for a permanent position with highest earning potential when you leave the service, write us. We will finance you while you train.

Write Box 246, The Journal.

No new legislation will be needed to implement the Army Reorganization.

This is because Secretary Stahr does not propose to eliminate any of the statutory branches, such as the Quartermaster Corps, Signal Corps, Ordnance, etc. He does propose, however, that their responsibilities be slashed.

This would parallel the Air Force Reorganization in which the Air Force Systems Command and Air Force Logistics Command were created to replace the Air Research and Development Command and the Air Materiel Command. The Air Staff was reorganized in line with these changes.

TAILORED to fit your needs...

DESIGNED to save you 38.8%

You can buy USAA automobile insurance especially designed to meet the needs of the officer in the Armed Services... and at the same time save 38.8% off standard state-side rates. A USAA policy gives you sound coverage on bodily injury and property damage liability, medical payment, comprehensive and collision... and uninsured motorist coverage where permitted by state law.

USAA was organized in 1922 by a group of officers who recognized that service officers being a preferred risk group could save money on insurance. In 1960 alone, more than \$11,500,000 were returned to policyholder members in dividends. Today over 625,000 USAA policies are in force, in most areas of the world.

USAA is the oldest, largest and strongest non-profit insurance association serving officers.*

USAA employs no agents, pays no commissions, sells direct-by-mail. Results are maximum protection at the lowest cost. Best's, the leading authority in the insurance world, has consistently rated USAA "A Plus (Excellent)," its highest rating.

Wherever you serve,** USAA can serve you. Claims are settled promptly even in the remotest places.

Take advantage of insurance that's tailored for you. Save, too, on USAA's Comprehensive Personal Liability Policy and the Household Goods & Personal Effects Floater. Fill in coupon today and get the facts.

Send information on insurance covering: ☐ World-Wide Household and Personal Effects Floater ☐ Comprehensive Personal Liability ☐ Automobile insurance based on the following data:

Car Year	Make	Model	Body Type	Pass. Cap.	Serial Number	Motor No.	No. Cyls.
Cost	Purchase Date	New/Used	Current Car License Year State	Name in which car legally registered			

Is the automobile required by, or customarily used in the occupational duties of any person except in going to and from the principal place of occupation? _____

Is the automobile customarily used in driving to or from work? _____

If the automobile is customarily used in driving to or from work, how many road miles is the car driven one way? _____

Have you or anyone in your household had accidents or moving traffic violation convictions in the past three years? _____ If so, give details separately.

How many male operators (including insured) are under age of 25? _____

Age of each: _____ Relationship _____

Are any of the male operators under 25 owners, or principal operators, of the automobile? _____ Are all male operators under 25 married? _____

Does your car have extra equipment? _____

☐ Air Conditioner ☐ 2-Way Telephone ☐ Radio Comm. System ☐ Other: _____

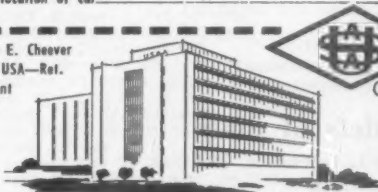

Name _____ Rank _____ Serial No. _____

Military Address _____

If car not at above address, give location of car: _____

☐ Active Regular ☐ Retired Regular ☐ Extended Active Duty ☐ Retired Reserve†
☐ Inactive Reserve† ☐ Former Member—no current military status ☐ Widow of eligible officer
†Membership must have been established while on extended active duty

President

UNITED SERVICES

Automobile Association

Dept. AJ-16 USAA Building, 4119 Broadway, San Antonio 15, Texas

*Membership in United Services Automobile Association is limited to active and retired Regular officers, midshipmen, cadets and warrant officers of the United States Army, Air Force, Navy, Marine Corps, Coast Guard, Public Health Service, Coast and Geodetic Survey; Foreign Service Officers of the Department of State; Reserve and National Guard officers when ordered to extended active

Federal duty for a period of six months or longer; the widows of such officers and warrant officers so long as their status is not changed by remarriage. Eligibility for membership, once established, shall continue so long as the risk is not unacceptable, for any reason, as determined by the Board of Directors or any authorized officer of the Exchange.

**USAA operates in the United States, its possessions and territories; Canada, Cuba and the Canal Zone; Great Britain, Japan, the Philippines, and certain U.S. bases in the Pacific; as well as in Western Continental Europe when the policyholder is an active duty.

Four Army Engineer Districts Aid NASA

The Army Corps of Engineers have designated four District Engineer Offices to assist in the acquisition of real estate and design and construction of new NASA facilities.

Selection of these District Offices followed a request by NASA to have the Corps of Engineers provide support for this nation's accelerated space effort. Design criteria for construction will be provided by NASA.

Responsibilities for the four Districts follows: The Jacksonville District Engineer will be responsible for new design

and construction at the Cape Canaveral Test Center; the Ft. Worth District Engineer, for facilities making up the Manned Spacecraft Laboratory near Houston; the Mobile District Engineer, for the land acquisition and easements in connection with the development of a static test facility for SATURN and NOVA class boosters in southwest Mississippi, on the Pearl River; and the Los Angeles District Engineer will be responsible for the design and construction of test stands for the F-1 engines at Edwards AFB Test Center, Calif.

Edwards, S/Sgt James H, Jr, as Lt Col.

USAFI Revises Course

In Review Mathematics

The U. S. Armed Forces Institute at Madison, Wisc, announces the availability of a revised course in review arithmetic, CI50. The material covered in this course is similar to that covered in refresher courses offered by civilian schools at the high school level.

Review Arithmetic is a refresher course for all Armed Forces members who want to review the basic principles of arithmetic. A few new topics have been added, and some of the old subjects have been expanded slightly.

L/G Burger Goes On Retired List; Maj. Stemple Assigned To Headquarters

Commandant—General David M. Shoup
Assistant Commandant—Lt. Gen. John C. Munn

Marren, Capt Martin J, jr, pd.

New DoD Booklet On Philippines Issued

A new revised, 206-page illustrated edition of the Pocket Guide to The Philippines is being distributed to members of the Armed Forces headed for that nation.

The booklet, published by the DoD Directorate of Armed Forces Information and Education, covers a wide range of basic and useful information about The Philippines. Copies may be obtained from the offices conducting the internal information programs of the various Services.

A feature of the revised Pocket Guide is an expanded section on the Tagalog language. Besides offering helpful hints on pronunciation of Tagalog words and phrases there are special vocabularies to help the servicemen in most of his every-day dealing with the Philippine people.

The history, geography, religion, economic resources, government, culture, education, entertainment, sports, food, and currency are fully discussed in the new Pocket Guide.

Particularly helpful to service personnel stationed or visiting the islands are the sections on what to see and how to get around the islands. Highlights of the major cities and pointers about less well-known places are featured. Also given are the latest data on travel facilities, hotel accommodations, tours, tips, holidays, and festivals.

Other special features of the revised edition of the Pocket Guide include a bibliography of selected books for further reading, a description of the Philippine Armed Forces and illustrations of Armed Forces uniforms and insignia, information on weights, measures, and time differences, and a map of the Philippines.

Parachute Training Down At Ft. Bragg

The Airborne School of the 82d Airborne Division at Ft. Bragg, N. C., will graduate its last Basic Airborne student in January.

The future program will revert to the era prior to 1954 when all airborne personnel in the U. S. were trained at Ft. Benning, Ga.

The 82d school was started in the latter part of 1953 to provide a steady input of paratroopers to the 82d Airborne Division and other units at Ft. Bragg. The high transfer and discharge rate required a school which could graduate sufficient trooper replacements for the Division.

The 82d Jump School has recorded its 250,000th Jump and has graduated its 50,000th Jumper in the 82d Airborne Division History.

Marine Corps Promotion List Status

THE following officers of the Marine Corps are the last officers as of 1 November 1961, who have been promoted or for whose promotion vacancies existed, under the Officer Personnel Act of 1947, to the grade indicated:

Capt(LDO)	Arthur C. Katen	-----

Instruction Jobs Open At Missile School

A CHANGE in the employment status of civilian contractor instructors at the Army Ordnance Guided Missile School, Huntsville, Ala., is announced by Col. William J. Macpherson, Commandant.

Some 116 civilian instructor positions heretofore filled by Philco Corporation, Radio Corporation of America and Associated Aero Science Laboratories, Inc. under contract with the Missile School are to become Civil Service positions over a period of eight months.

Colonel Macpherson said that all present civilian contract instructors as well as other interested persons will be given an opportunity to file an application for employment under Civil Service as training instructors. Experience in class room instruction of electronics and mechanical phases of missile systems is required.

The Civilian Personnel Office at the Army Ordnance Missile Support Agency, Redstone Arsenal, Ala., is now accepting applications for these positions. Applications may be made on Standard Form 57 which can be obtained from post offices or at any Federal activity.

Beginning salaries are \$5355 per annum for grade GS-7; \$6435 for grade GS-9; and \$7560 for grade GS-11. The grade and salary offered will be based on the applicant's qualifications.

Former Army Air Defense Chief Says Hercules Points Way To Zeus Success

Lt. Gen. Stanley R. Mickelsen, USA-Ret., who commanded the nation's continental Army air defenses before his retirement in October 1957, has expressed confidence in the success of the Nike Zeus anti-missile missile.

General Mickelsen, now technical advisor for Hughes Aircraft Co., stopped in Colorado Springs while en route from Los Angeles to his home in Alexandria, Va., in order to attend the recent retirement ceremonies for Col. Lee J. Davis, Deputy CofS for Administration and Logistics, of the Army Air Defense Command. Colonel Davis was Detroit Defense Commander when Gen. Mickelsen was CG of the Army Anti-aircraft Command, now the Army Air Defense Command.

"There is no question in my mind of the ultimate success of Nike Zeus in its role of terminal defense against ballistic missiles," General Mickelsen said, adding that his optimism is "supported by the performance of the Nike Hercules," the missile with which Army air defense units in 29 defense areas of the United States and in Greenland are now armed.

The Hercules, General Mickelsen pointed out, has demonstrated an ability to shoot down other Hercules missiles. This was done three times in missile-to-missile firings, with the target Hercules and the intercepting Hercules closing together at a combined speed of Mach 7.

While designed for antiaircraft use, the Hercules is a guided ballistic missile, and its successful interception by another Hercules was part of the tests conducted by the Army to demonstrate the feasibility of intercepting a ballistic missile.

"This was on the first attempt each of the three times," General Mickelsen said.

The general served as commander of the Army's air defenses in the U. S. through the period of most extensive deployment of the Nike Ajax, the world's first operational guided missile, when missiles replaced the old antiaircraft artillery guns throughout most of the system. He was responsible for early planning for deployment of the atomic-

capable Hercules, the successor to the Ajax.

General Mickelsen also had praise for the North American Air Defense Command, of which the Army Air Defense Command is a major component. NORAD combines the air defense forces of both Canada and the U. S.

General Mickelsen said that NORAD "could well be a model for other unified commands" and termed it "the best answer for the joint deployment of air defense forces."

Colonel and Mrs. Davis live at 15 Friendship Lane and plan to remain in Colorado Springs. He will enter the investment field.

T.V. DRONE

A development in the use of television techniques for tactical application to drone reconnaissance and target acquisition is reported at the Army's Electronic Proving Ground, Ft. Huachuca, Ariz.

Recently completed flight tests demonstrated the ability of the Army's SD-1 Surveillance Drone to accomplish reconnaissance missions with a TV camera installed.

In conjunction with the Army Signal Corps, Radioplane Division of Northrop Corporation developed and is producing the SD-1 Surveillance Drone System. It is presently operational with the U.S. Army in Europe, the Far East and the United States, performing photographic and reconnaissance missions.

Highly mobile, the SD-1 may be zero-length ground launched in rough terrain from a camouflaged position and flown by remote control over enemy installations. Upon completing its mission, the SD-1 is flown to a pre-designated area for parachute recovery.

Other specialized sensory equipment may be carried, depending on the particular mission requirements.

SERVICE FAMILY NOTES

Louise B. McGiffert
Family EditorBertie Johnson
Associate Family Editor**Mrs. Robert Kennedy Will Open JANGO Bazaar; Service Groups Plan Meetings**

PICTURED at right, Mrs. David Traub, Chairman of the 1961 Junior Army-Navy Guild Organization (JANGO) Bazaar and wife of Army Lieutenant General Traub, examines Bazaar items with Mrs. Joseph F. Carroll, Air Force Bazaar Chairman and wife of Air Force Lt. General Carroll; and Mrs. John T. Hayward (center), Navy Bazaar Chairman and wife of Vice Admiral Hayward.

MRS. Robert Kennedy, wife of the Attorney General will open the JANGO Bazaar 21 November, at 10:30 AM at the Bolling AFB Officer's Club. This was announced by Mrs. J. Stanley Holtner, wife of Major General Holtner USAF and President of the Junior Army-Navy-Guild Organization, at the home of General Lyman L. Lemnitzer, JCS Chairman.

Meeting at the Lemnitzer quarters, Ft. Myer, Va., for a preview showing of Bazaar items and a "work party", were many of the wives of highest ranking military officers in all services. Informally greeting the ladies on their arrival were Mrs. Lemnitzer and Mrs. David Traub, wife of Lieutenant General Traub USA. Mrs. Traub is the Bazaar chairman.

Mrs. George Decker wife of the Army CofS, and Mrs. Curtis LeMay, wife of

the Air Force CofS, received many compliments on their artistic abilities. Each of the ladies brought along the oil paintings they will contribute to the Bazaar. Mrs. John Hayward, wife of Vice Admiral Hayward, Navy Chairman for the Bazaar was the Navy Wives representative.

The gathering was a showing of inter-service loyalty to the JANGO organization, whose members are composed of wives and daughters of all the armed services. The annual Bazaar is the highlight of the JANGO year.

Wearing aprons and busy working together on items to be sold at the Bazaar were Mrs. Clyde Eddleman, wife of the Army Vice CofS, Mrs. Frederic H. Smith, jr., wife of the Air Force Vice CofS and other high ranking military wives.

KOREAN CHILDREN GET CLOTHING HELP

THE first of more than 200 cartons of clothing for Korean needy children, the result of Hawaii's fifth annual "Clothes for Korea" drive, has arrived in Seoul.

The cartons came aboard a plane bringing General James F. Collins, CofC, U. S. Army, Pacific, to Korea for a four-day inspection tour. Mrs. Collins, who personally sponsored this year's drive, presented the advance shipment to the Kyung Saeng Orphanage in Seoul.

The remainder of the clothing is expected to arrive at Inchon 25 November aboard the USNS Mann.

Previously, the "Clothes for Korea" drive was sponsored by Mrs. I. D. White, wife of the former U. S. Army, Pacific commander.

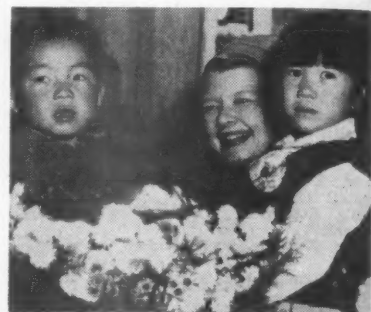

Service Folk

Maj. George Gatman defeated Lt. Col. John Morgan to win the 1961 fall golf championship at Ft. Leavenworth, Kans.

Lt. Col. William O. Marcou has been assigned as Chief of the Individual Training Branch, G-3 Section of First Army, Governors Island, N. Y. Three other members of his family are in the Armed Services. His brother Leo is in the Navy on the USS Wasp, and his sister Margaret is also in the Navy, an instructor at Bainbridge U.S. Naval Station, Md. His brother Brendan is serving in Massachusetts in the Air Force. Colonel Marcou returned from Korea where he had been Commanding Officer, Army Support Group, Joint Security Area.

Mrs. Gilven M. Slonim has been elected President by wives of officers assigned to the staff of the Commander, Antisubmarine Force, Pacific Fleet, VAdm. J. S. Thach. Mrs. R. W. Luke is Treasurer. The wives have voted to lend their support to the Navy-Marine Residence Foundation to be built in Washington, D. C., for the aid of widows of Navy and Marine Corps officers.

Flowers For General's Wife From Orphans In Korea

CHILDREN at the Kyeng Seng Orphanage near Seoul present Mrs. James F. Collins, wife of the Commander-in-Chief, US Army, Pacific, with flowers grown on the orphanage farm. Mrs. Collins visited the orphanage to turn over several boxes of clothing collected by Army wives' clubs and American-Korean community organizations during the fifth annual "Clothes for Korea" drive.

This is the time of year when Service wives throughout the world are busy with projects to help thousands of underprivileged children.

Belvoir Club Meets

MRS. Stephen R. Hanner, wife of Ft. Belvoir's Commanding General, poses with Mrs. E. A. Eber, president of the Belvoir Garden Club, in front of the fireplace in the music room of Woodlawn Mansion during a tea given by the ladies of the Garden Club.

All-Service Line For Dental Wives

Thursday, 16 November, at 12:30 p.m., the Army Dental Wives will meet for luncheon at the Walter Reed AMC Officers' Club, when hostesses will be wives of dental officers attached to the Army Surgeon General's Office.

Forming the receiving line with Mrs. George Timke, Club President, will be Mesdames Joseph Bernier, wife of the Chief of the Army Dental Corps; Oscar Ogren, wife of the WRAMC Director of Dental Affairs; Clinton Lyter, wife of the Commanding General, WRAMC; Floyd Wergeland, whose husband commands Walter Reed General Hospital; Curtis Schantz, wife of Admiral Schantz, Assistant Chief, Navy Bureau of Dentistry; and Maurice Harlan, wife of the Air Force Assistant Surgeon General for Dental Services. Other guests attending the affair will be Mrs. Walter K. Wilson, jr. wife of the Army Chief of Engineers, and Mrs. Larry MacQueen, President of the Ft. Belvoir Officers' Wives Club.

A musical program will be presented by Mrs. Richard Darst, a well known pianist of the Washington area.

Camp Pendleton Wives Complete Course

TWENTY-NINE officer wives have completed a three-week Navy Relief Volunteer Training Course at the Camp Pendleton, Calif., Marine Corps Base.

The Base Commander, Brig. Gen. Raymond L. Murray, presided at the graduation, acting in his capacity of President of the Camp Pendleton Auxiliary of the Society. Miss Myrle James, Field Representative of the Navy Relief Society from Washington, D. C., served as course instructor.

The following ladies received graduation certificates: Mesdames Dorothy Andrus, Judy Birdwell, Iris Brandt, Myrtle Butler, Frances Burke, Shirley Cox, Mercedes Daggett, Betty Dowd, Janine Floyd, Marilyn Grubbs, Pat Jackson, Phyllis Jefferson, Susan Lee, Mary Merritt, Helen Murray, Claudine Patton, Linda Porter, Neva Quattlebaum, Irene Reagan, Yvonne Reid, Joy Rubin, Blanche Shul, Lucille Valentine, Helen Voth, Connie Wilkie, Matha Williams, Barbara Worchester, and Joan Wynn.

The Northern Virginia Chapter of the Daughters of the United States Army will meet Thursday, 16 November, at 12 o'clock at Arlington Hall. With Christmas in the offing, the program is geared to making the holidays gayer and more decorative.

The Inspector General Wives' Group has installed the following officers: President—Mrs. Gerald E. Feidt; Vice President—Mrs. James F. Pearsall; Secretary and Treasurer—Mrs. Joseph R. Loffin.

Mrs. Stephen Alles, wife of the Under Secretary of the Army, and Mrs. George H. Decker, wife of the Army Chief of Staff, will be honor guests, when members of the group meet for their monthly luncheon at the Ft. McNair Officers' Club, 16 November.

The Army Ensemble will furnish entertainment.

The Antilles Command OWC recently donated an electric stove to the nuns of the Colegio del Perpetuo Socorro located at Coqui near Salinas, Puerto Rico. The nuns have been teaching and taking care of the children of the Colegio del Perpetuo Socorro since their arrival in Puerto Rico from Cuba last May.

Coast Guard OWC will meet 14 November at Evans Farm Inn, McLean, Va. After luncheon there will be an informal talk by Mr. Austin Kiplinger, publisher of the Kiplinger Newsletter and Changing Times Magazine.

"Civil Defense—Your Insurance for Survival" was discussed at the 3 November meeting of the DCSLOG Officers' Wives Club, held at the Ft. Myer theater. The speaker and discussion leader was Mr. Eugene J. Sleeve, Chief of the Briefing Division, Civil Defense Headquarters, who came from Battle Creek, Mich., for the presentation.

The Army Finance OWC will hold a "Harvest Time" luncheon 14 November at Arlington Hall Officers' Club at noon. Mrs. Dan Tibbitts will speak and demonstrate table arrangements of artificial and dried plants and flowers. Hostess Chairman for the luncheon is Mrs. J. F. Whitton. Assisting her are Mesdames: J. Brigandi, C. R. Rotz, F. W. Clayton, and L. O. Rohde.

The Navy Supply Corps OWC will meet 14 November at noon at the Army-Navy Country Club, and will feature a presentation by Mr. Prahasto, the Deputy Cultural Attache from Indonesia. Among the guests will be the wife of the Military Attache, Mrs. R. M. S. Soerjosoerarsjo; wife of the Cultural Attache, Mrs. Doedi Soemawidjaja; wife of the Naval Attache, Mrs. R. H. Bodojo; wife of the Second Secretary, Mrs. R. A. K. Sumitro and the Deputy Cultural Attache's Assistant, Mr. Sira. The ladies will wear their colorful native dress.

The President of the Club, Mrs. John W. Crumpacker, wife of Rear Admiral Crumpacker, Chief of the Bureau of Supplies and Accounts, will head the receiving line, assisted by Mrs. Thomas A. Long, wife of Rear Admiral Long, Assistant & Deputy Chief of the Bureau of Supplies and Accounts; Mrs. Louis M. Detweiler, Executive Chairman; Mrs. R. Cobb, Asst. Executive Chairman and Mrs. John B. Cline, Luncheon Chairman.

The Ft. Eustis, Va., OWC November luncheon welcomed Mrs. Herbert B. Powell, wife of General Powell, CONARC CG, as guest speaker. The beautiful floral decorations were prepared by a committee of wives from the 774th Transportation Rail Group and the NCO Academy, with Mrs. W. V. Grace as Chairman.

Service Weddings and Engagements

COL. Mary Louise Milligan, Director of the Women's Army Corps, and **Mr. Elmer Edwin Rasmuson** were married in a morning ceremony at the North Post Chapel, Ft. Myer, Va., 4 November, by Monsignor Joseph Chmielewski. The bride is the daughter of Mrs. George Vincent Milligan and the late Mr. Milligan, and the bridegroom is the son of Mrs. Edward Anton Rasmuson of Anchorage, Alaska, and the late Mr. Rasmuson.

Miss Lille Rasmuson and Mr. Edward Rasmuson attended the couple.

Mrs. Rasmuson holds degrees from the Carnegie Institute of Technology and the University of Pittsburgh. Her husband, who is a graduate of Harvard College and the Harvard Graduate School, studied at the University of Grenoble. He is President of the National Bank of Alaska, President of the Board of Regents of the University of Alaska, Swedish Vice Consul for Alaska and serves as the Secretary of the Army's Civilian Aide in Alaska.

BRAGAN-McCONNELL—Col. (USA) and Mrs. Wayne D. McConnell of 5416 Youngblood St., McLean, Va., announce the engagement of their daughter, Judith, to Mr. Dell Arnett Bragan, son of Mr. and Mrs. DeWitt Bragan of Statesboro, Ga.

Miss McConnell, who attended Wilson College in Pennsylvania for three years, will graduate in June from George Washington University, with an A. B. degree in Psychology. Her fiancé, who has attended the U. S. Naval Academy, the University of Georgia and George Washington University, is currently completing training in the Air Force at Lackland AFB, Texas.

A June wedding is planned.

Miss McConnell

MANGANARO-BUTLER—Miss Benton Addison Butler, daughter of Col. (USA) and Mrs. James Jenkins Butler of Ft. Wayne, Mich., became the bride of Lt. S. Joseph Manganaro, 21 October, at the Post Chapel, Ft. Meade, Md. The bridegroom is the son of Dr. and Mrs. Carl J. Manganaro of Sterling, Colo.

The bride chose her cousin, Miss Marjean Benton, as her maid of honor, and as bridesmaids, Misses Suzanne Major, Beverly Kane and Mrs. G. David Hardy. Groomsmen included Lt. Col. Joseph Sain, Lts. William Krizan, Matthew Bowe, William Kaiser, Rafael Fernandes and Charles Rish.

Mrs. Manganaro is a graduate of Cornell University and her bridegroom was graduated from Creighton University.

Upon their return from a southern wedding trip, Lieutenant Manganaro will rejoin his unit for overseas duty, while his bride returns to her parents' home in Detroit, until she can join her husband in Europe.

BITNER-OVERLY—Mr. and Mrs. Clifford E. Overly of Youngstown, Ohio, have announced the engagement of their daughter, Sally Ann, to Mr. George Edward Bitner, son of Col. (MC, USA-Ret) and Mrs. Robert E. Bitner of 502 Linden Ln., Falls Church, Va.

Now a candidate for a Master's degree in Home Economics at Pennsylvania State University, where she is an assistant teacher in the University Nursery School, Miss Overly is a graduate of Ohio Wesleyan University. She is a member of the Chi Omega, social, and Theta Alpha Phi, honorary dramatics, sororities. Her fiancé, who attended St. Stephen's School, Alexandria, Va., and is a graduate of Ohio Wesleyan, is now a student at the George Washington University Law School. He is a member of the Phi Kappa Psi, social, and Phi Alpha Theta, honorary history fraternities.

HOPE-GIBBONS—Col. (USAF) and Mrs. Robert J. Gibbons of Wright-Patterson AFB, Ohio, announce the recent marriage of their daughter, Kay, to Mr. Gordon G. Hope, jr., son of Mr. and Mrs. Hope of Grand Rapids, Mich., at the Wright-Patterson AFB Chapel.

Miss Candy Gibbons was maid of honor for her sister, and Mr. Don Hope served as his brother's best man.

Mrs. Hope attended the University of Michigan. Her bridegroom, a graduate of Western Michigan University, has been an English instructor at Wayne University in Detroit.

The couple will make their home in San Francisco.

STONE-LEE—CWO. (Ret) and Mrs. Joseph B. Lee of 2149-30th St., N. E., Washington, D. C., announce the engagement of their daughter, Lucile Virginia, to Midshipman Thomas Edward Stone, USNA, son of Col. (USAF-Ret) and Mrs. John N. Stone of 6018 Arlington Blvd., Falls Church, Va.

Miss Lee, who attended schools in Rome, Switzerland and Hong Kong and is a graduate of the Immaculate Junior College, where she majored in Art, is now a student at the Patricia Stevens Finishing School. Her fiancé is a first classman at the USNA.

A June wedding is planned.

REGAN-SCHOONOVER—Mr. and Mrs. Lawrence Schoonover of Hempstead and Pound Ridge, N. Y., have announced the engagement of their daughter, Judith, to Lt. (jg) James Regan, USN, son of Mr. and Mrs. Edward Regan of Flushing, Queens, N. Y.

Miss Schoonover, whose father is a novelist, is a journalism graduate of the University of Denver. Her fiancé, USNA '59, is now stationed at Quonset Point, R. I.

A January wedding is planned.

NELIS-JAMES—Mr. and Mrs. George F. James of Scarsdale, N. Y., have announced the engagement of their daughter, Suzanne Pauline, to Lt. (jg) Patrick J. Nelis, USN, son of Mr. and Mrs. Hugh Nelis of Philadelphia.

Miss James, whose father is a Director and Senior Vice President of Socony Mobile Oil Company, is a junior student at Connecticut College for Women and a graduate of the Bishop's School, La Jolla, Calif. Lieutenant Nelis, who is USNA '59, is now serving aboard the carrier, USS Enterprise, based at Norfolk, Va.

ICAF Commandant to Entertain
The Commandant of the Industrial College of the Armed Forces, RADM. and Mrs. Rufus E. Rose, will be hosts at a series of "at homes" at Qtrs. 10, Ft. McNair, in November for staff, faculty, students, their wives, members of the Department of Defense and Joint Chiefs of Staff, and the Commandant and Deputy Commandants of the National War College.

SHERIFF-TROWBRIDGE—Mr. and Mrs. John Harrison Trowbridge of New York, have announced the engagement of their daughter, Barbara Waram, to Ens. Rothwell Mitchell Sheriff, jr., USNR, son of Mr. Sheriff of New York, and the late Mrs. Mary B. Sheriff.

Miss Trowbridge, an alumna of Foxhollow School in Massachusetts, attended Vassar College. Her fiancé, who attended

Harrow School in England and is a graduate of Yale University, is currently serving with the Atlantic Fleet, aboard the USS Boston.

SIGNAL ANNIVERSARY

The November issue of "SIGNAL" commemorates the 15th Anniversary of the Armed Forces Communications and Electronics Association, and features a series of top-echelon reports.

"Trends in Weapons Systems Development" is the subject of an article by John H. Rubel, Deputy Director, DoD Research and Engineering.

"Today's Challenge Requirements" is the topic chosen by RADM. Frank Virden, USN, former Director, Naval Communications.

"Space Communications and Cooperation with Iron Curtain Countries" is discussed by Andrew G. Haley, General Counsel, American Rocket Society.

"Big Era in Space Communications" is the title of an article by H. E. Weppeler, Radio Engineer, American Telephone & Telegraph Company.

"Communications — A Look Ahead" is the subject of Brig. Gen. David Sarnoff, USAF-Ret., Chairman of the Board, RCA, and "Status of Thermionic Converters" is analyzed by J. F. McAllister, General Manager, Power Tube Department, General Electric Company.

"More Communications for Defense" is the title of an article by Thomas F. McMains, Vice President and Assistant to President, The Western Union Telegraph Company.

A new paper-back 162 pages.

THE CASE OF GENERAL EDWIN A. WALKER

by Kent and Phoebe Courtney

WHAT THEY SAY ABOUT "THE CASE OF GENERAL EDWIN A. WALKER"

"In my judgment it is a 'must' . . . Enclosed is my check covering 100 copies."

—Congressman
Edgar Hiestand, Calif.

"Please ship me 25 copies of *The Case of General Edwin A. Walker*."

—Congressman
Gordon H. Scherer, Ohio

"South Carolinians who want a good account of the campaign to silence anti-Communists can find it in a book by Kent and Phoebe Courtney entitled *The Case of General Edwin A. Walker* . . . The *News and Courier* recommends it as an accurate summary of the Walker admonishment, Senator Thurmond's disclosure of the Ful-

bright Memorandum, and related events.

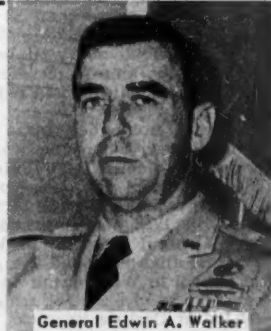

—Excerpts from an editorial in the *Charleston, S. C. News & Courier*

"Have read *The Case of General Edwin A. Walker* not only with a great deal of interest, but it has given me much-needed information."

—Congressman
Clare E. Hoffman, Mich.

"I believe that every American should read this book in order to be informed as to what is happening to those people who take a firm stand against the International Communist Conspiracy."

—Congressman
James B. Utt, Calif.

Congress Wants To Restrict Medical Research Surgeons Association Hears Different Story

A SENIOR Army medical researcher has called for more Armed Forces medical research on infectious diseases—from the common cold to maladies reported only from the heart of Africa.

His opinions are at odds with Congressional sentiment, expressed during the last session and promising to grow stronger next year, that military medical research be restricted to diseases and medical conditions which are primarily military in nature.

Many Congressmen contend that diseases which are primarily civilian in nature should be investigated not by the Services, but by such civilian Government groups as the National Institutes of Health and the Public Health Service.

Col. Dan Crozier, MC, USA, Chief of the Army Medical Unit, Frederick, Md., that there "is no area of military research in which the potential returns are greater than in the investigation of infectious diseases. Whether this be the study of the prevention of the common cold or the treatment of a little known disease reported only from the heart of Africa, the knowledge gained will sooner or later be of benefit to someone."

Colonel Crozier said that among "Army personnel during WW II there were five times as many admissions to hospitals or quarters for disease as there were for battle casualties. The average number of Army personnel non-effective each day because of disease was the equivalent of 21 full-strength divisions."

Colonel Crozier pointed out that in the "early days of the New Guinea campaign, six to eight soldiers were lost to their unit because of malaria for each one evacuated as a battle casualty, and at one airfield in Africa the infection rate for this disease during one period exceeded 2,000 per thousand troops per annum. The loss, within the first few weeks of a campaign, of 50% of the unit strength due to a single disease is a discouraging prospect for a commander, if indeed, he has not himself already become a casualty."

"Still another factor of significance in connection with the High incidence of disease is the cost of claims against the Government for service-connected disability. During early 1946," he said, "the Veterans Administration was paying \$2.5 million per month in compensation claims for chronic malaria."

"This cost, for one month only, was two and one half times the entire cost of the Army sponsored research programs in the chemoprophylaxis of malaria which began in 1947 and resulted in the modern effective method of control of this disease."

MEDICAL NOTES IN THE FORCES:

M/G Bohlender Will Retire At Brooke AMC; Lectureship Honors Col. John Simpson

MAJ. GEN. John F. Bohlender, CG of Brooke Army Medical Center, Ft. Sam Houston, Tex., will retire 30 November after more than 33 years military service.

General Bohlender will be succeeded by Maj Gen James L. Snyder, Commandant of the Medical Field Service School there.

General Bohlender came to Brooke from Denver, where he was Commander of Fitzsimons General Hospital.

General Bohlender was commissioned a first lieutenant in the Army Medical Corps in 1928 and interned at Walter Reed General Hospital in Washington, D. C. He then attended the Army Medical School in Washington and the Medical Field Service School, which was then located at Carlisle Barracks, Pa.

General and Mrs Bohlender will reside in San Antonio in their recently acquired home at 200 Arvin Drive.

Col. John Simpson, MC, USA-Ret, has been honored by a lectureship named for him. One time chief of Obstetrics and Gynecology Service at Brooke General Hospital, the lectureship was established by the Armed Forces Obstetrics and Gynecology Seminar this month when it met at Lackland AFB, Tex. Colonel Simpson, now Medical Director of the Robert B. Green Hospital in San Antonio, organized the first of the Army-Navy-Air

Force seminars in his medical specialty in 1952. The John Simpson Lecture will be presented each year at the seminar by an outstanding military obstetrician and gynecologist.

Maj. Gen. Floyd L. Wergeland, CG of Walter Reed General Hospital, has been elevated to the 33rd degree of the Supreme Council, Ancient and Accepted Scottish Rite of the Southern Jurisdiction.

Col. Armstead In Command

Col. Robert C. Armstead has assumed command of the Marine Air Reserve Training Detachment, NAS Brooklyn, N. Y., after duty with the 1st Marine Air Wing in Japan.

He relieved Col. Robert T. Whitten, who will be assigned to Norfolk. The Brooklyn detachment is the largest of its kind in the world.

SOVIETS HAVE TWO MILITARY MEDICAL ACADEMIES

THE Soviet Union selects the "top men" in its medical schools for attendance at its Military Medical Academy in Leningrad. A similar institution is maintained in Moscow.

Col. Joe M. Blumberg, MC, USA, Deputy Director of the Armed Forces Institute of Pathology, told the AMS that the Leningrad Military Medical Academy is a medical school with approximately 44 departments.

He noted that a great deal of training is given in subjects which pertain to trauma. The students, who have completed three years of medical training at other institutions, spend a year and a half in anatomy after coming to the Military Medical Academy.

At the Academy, he said, they "had many teaching specimens of all types, and in one room there were 8,000 skulls to be studied. We were shown a teaching museum and the material contained therein."

"In the dissecting rooms the students were actively at work, with about 20 students to one body. They commented that cadavers were in short supply," he said.

Colonel Blumberg noted that although "women physicians served with the military forces in the last war, only men are considered now, and these are usually the top men in each medical school from which they are selected." In the civilian population, however, 75% of Russian physicians are women.

Colonel Blumberg said that he was not given an opportunity to go through the entire academy.

FAMILY DELEGATES

Capt. Theodore E. Hoffman (MC) USN, Senior Medical Officer of the Parris Island, S. C., Marine Corps Recruit Depot, attended the Military Surgeons sessions.

Accompanying him was his wife, the former Mildred E. Rambo, a Lieutenant Colonel in the Army Nurse Corps Reserve.

Former PHS Chief Urges Foreign Help

MORE foreign aid funds for international health services are needed, Dr. Leroy E. Burney, retiring President of the Association of Military Surgeons, declared.

Underdeveloped countries have "dramatic and appealing potentialities for good work and good will if a larger percentage of our foreign aid funds were made available for health services, training of personnel and health research," Dr. Burney said.

The Vice President of Health Sciences at Temple University and former Surgeon General of the U.S. Public Health Service called for a pooling of the world's scientific resources for the improvement of health throughout the world.

Setting the theme for the meeting—international medicine as a path toward world progress—Dr. Burney said that a combining of these resources "for the betterment of human health ranks with the great challenges of our times."

"There has been increasing support by the Federal Government in the international health field, particularly through the International Cooperation Administration and its newly created successor—the Agency for International Development," Dr. Burney said. He stressed, however, that more support is necessary if we "would give some real meaning to our utterances about the dignity and worth of the individual and the compassion of a free society with its democratic institutions."

Dr. Burney praised the work of international health agencies such as the World Health Organization, and private agencies such as MEDICO and Project HOPE for their worthwhile activities in the international health field.

Flag Selectee Heads ASW

Capt. John N. Shaffer, a Fiscal Year 1962 Flag Officer selectee, will relieve RADM. Lloyd M. Mustin as Director of the Navy's Antisubmarine Readiness Division, in December. New orders for Admiral Mustin have not been announced.

Will Leave Picatinny

Lt. Col. Crawford D. Lyons, Director of Picatinny Arsenal's Quality Assurance Division, Dover, N. J., has received orders to the Eighth Army in Korea during December. He will serve in headquarters at Seoul.

M/G Cooney Elected Surgeons President

MAJ. GEN. James P. Cooney, USA-Ret., former Deputy Surgeon General of the Army and USAEUR Surgeon, has been elected President of the Association of Military Surgeons.

General Cooney, who succeeds retired Public Health Service Surgeon General Leroy E. Burney, is now Vice President for Medical Affairs of the American Cancer Society, with headquarters in New York.

New First Vice President is RADM. Calvin B. Galloway, MC, USN, of Bethesda.

Other elected officers include: Col. Robert C. Kimberly, MC, Md. NG, Second VP; William S. Middleton, M.D., Veterans Administration, Third VP; Maj. Gen. M. S. White, USAF, MC, Fourth VP; Brig. Gen. Frank E. Wilson, MC, USAF, Fifth VP; Dr. Luther Terry, Surgeon General of the Public Health Service, Sixth VP; Maj. Gen. Thomas J. Hartford, retired Deputy Surgeon General of the Army, Executive Director; Col. Robert E. Bitner, USA-Ret., Editor; and Lt. Col. George M. Beam, AUS-Ret., Executive Secretary.

Change Army Diet To Cut Heart Disease

From first page—

mend chicken, turkey and other fowl, fish and shellfish, cottage cheese, cereals, fruits, nuts and natural vegetable oils.

Colonel Walker and Colonel Sherman said that atherosclerosis is the leading single cause of death in the U. S. and the leading cause of death from disease among active Army personnel.

They pointed out that 60% of the deaths from atherosclerosis among Army personnel occur before these people can reach medical facilities.

"The death and disability rate from this cause," they said, "is seven times as great among officers as among enlisted personnel."

"This is largely due to the fact that officers comprise an older group who are due for retirement, but the disease is clearly not confined to oldsters who are due for retirement," they said.

"It sometimes strikes in the twenties, frequently in the thirties and forties, when career personnel are approaching their peak value to the Service. The average age at which active duty personnel are separated for disability because of atherosclerosis is 44 years; the median age of death among those dying on active duty from the disease is 43," they recounted.

It is assumed, Doctors Walker and Sherman said, "that atherosclerosis is a comparable medical problem in the Departments of the Navy and Air Force."

"Evidence would indicate," they said, "that atherosclerosis is not an inevitable concomitant of aging, but rather a pathologic process that may be encountered at any age. Among American soldiers killed in Korea at an average age of 22 years, 77% had demonstrable coronary atherosclerosis. Similar findings have been reported in an Air Force study done on flying personnel killed in aircraft accidents."

Hughes Guidance Chief

James Richard McCharles has been appointed Manager of the Guidance and Controls Division of Hughes Aircraft Company's Aerospace Group, it is announced by Roy E. Wendahl, Vice President and Group Executive at Culver City, Calif.

A 10-year veteran at Hughes, Mr. McCharles had served as Acting Manager of the division since it was organized earlier this year. Other positions he has held in the company include Director of Project Management and Director of Weapon Systems Testing in the Aerospace Group, Assistant Director of the Airborne Systems Laboratories, and Manager of the Computers and Controls Department.

Refrigerator Ships Out From Mothballs

The Navy this month will put into commission three refrigerator ships, now undergoing activation, alteration and outfitting.

ARCTURUS (AF-52), formerly the USNS Golden Eagle, will be commanded by Capt. Maxey B. Davis.

PROCYON (AF-61), formerly the USS Flying Scud, will be commanded by Capt. Norman I. Lee, jr.

BELLATRIX (AF-62), formerly the SS Fleetwood, will be commanded by Cdr. Nathan E. Dozier.

Senators Will Open Walker Case Review After General's Resignation

THE second resignation of Maj. Gen. Edwin A. Walker and the Army's prompt acceptance of it will highlight hearings before the Stennis Subcommittee of the Senate Armed Services Committee when it reconvenes 27 November.

General Walker's resignation was accepted as of 4 November. This means he will be able to appear in person before the Subcommittee and to testify free of all military control.

The General's decision to resign from the Army was made public 2 November by the office of Senator Strom Thurmond (D-SC), who has been a leader in publicizing charges that the Defense Department has "muzzled" military officers opposing Communism.

The Senator's office also released to the press copies of a statement by General Walker to the Subcommittee of which Senator John Stennis (D-Miss) is Chairman.

The Army subsequently announced that it received General Walker's resignation on the afternoon of 3 November. The next day it issued this statement: "The Department of the Army announced today that the resignation of Maj. Gen. Edwin A. Walker has been accepted November 4."

General Walker's statement to the Senate Subcommittee related that he had tried to resign in 1959 when he first received orders to command the 24th Division in Germany, but that the Secretary of the Army had denied his request. In that letter of resignation he said that, while he had looked forward for many years to commanding the 24th Division, "It is fair to say that in my opinion the fifth column conspiracy and influence in the United States minimize or nullify the effectiveness of my ideals and principles, military mission and objectives, and the necessary American public spirit to support sons and soldiers. I have no further desire for military service at this time with this conspiracy and its influences on the home front."

At the time of this first resignation, General Walker was assigned as Commander of the Arkansas Military District, in which capacity he commanded the troops in maintaining order in Little Rock during the school crisis there. "Federal troops were used," he said, "contrary to my personal wishes. I had hoped and prayed that the Army would not become involved in that non-military issue."

In his statement to the Subcommittee, General Walker said:

"My career has been destroyed in its usefulness to my country. I cannot accept retirement with its emoluments and benefits. To do so would be a compromise with my principle."

"I take leave of military duty with a heavy heart. I must find other means of serving my country in the time of her great need, in order to pursue the dedication of a lifetime."

"To do this, I must be free from the power of little men who, in the name of my country, punish loyal service to it. No man can judge this nation and its emergency with respect to my performance on the field of battle—past or future, my devotion to country, my obligation to this Congress or to the parents of a son."

"Even before this subcommittee was directed to study censorship, there had been much public concern reflecting a long period of interest in the terms of censorship vs. the terms for survival. That public interest concerned itself with areas extending back through Generals Stilwell, Patton, Patch, MacArthur, General Walton Walker, and General Van Fleet, to the present date. These are all areas of public and national interest during my time of service, and are properly part of any investigation of censorship of officers, non-commissioned officers, and soldiers in the performance of their missions and duties in behalf of national security on present-day terms."

General Walker included in his statement many quotations pointing up the communist menace and the need for actively combating it. Among those quoted were General Douglas MacArthur, Admiral C. Turner Joyce, General Mark

Clark, General John R. Deane, and FBI Director J. Edgar Hoover. To show his motivation he also quoted the Cadet Prayer and the Cadet Honor Code as used at the U.S. Military Academy.

He concluded by quoting from General MacArthur: "So inordinate has been the application of the Executive power that members of the Armed Services have been subjected to the most arbitrary and ruthless treatment for daring to speak the truth in accordance with conviction and conscience."

Then General Walker closed by saying: "These are words that should ring through the land but do not—counsel that should have been heeded but was not."

"To what voice, then, do we hearken?"

"The people, the truly militant voice in a republic, can and will be heard. Once unleashed—I have faith that from their fury constitutional power will prevail, rededicating this nation and its sons in uniform to the will and power of the people for freedom and justice under the sun."

New Book Supports Maj. Gen. Walker

"The Case of General Edwin A. Walker," by Kent and Phoebe Courtney. Published by the Conservative Society of America. 155 pages, paper bound. Price \$2.00.

THE resignation by Maj. Gen. Edwin A. Walker from the Army, thus foregoing his rights to retirement pay and privileges, strongly highlights his case and makes this defense of his conduct most timely.

The volume, however, can not be considered an impartial analysis of the circumstances leading to the reprimand of General Walker. It is a defense not only of his position but also of the late Senator Joseph McCarthy, of the John Birch Society, and of the ultra-conservatives in politics.

The authors are a husband-and-wife team, who are publisher and editor, respectively, of the Independent American, which they describe as a "national Conservative Political Action Newspaper." They also publish Tax Fax pamphlets advocating the conservative position on such issues as foreign aid, federal aid to education, urban renewal, etc.

Mr. Courtney is also commentator of the radio edition of the Independent American, a weekly broadcast of the "Conservative side of the news." He is a graduate of the School of Business Administration of Tulane University, majoring in economics and later serving as an instructor in economics at Tulane. His wife, Phoebe Courtney, attended Newcomb College in New Orleans.

Kent Courtney is also the National Chairman of the Conservative Society of America.

The book is particularly valuable for its full description of General Walker's "Pro-Blue training program for the troops under his command."

Discussing the charges against General Walker, the authors state:

"It is odd indeed that one of the findings against General Walker was that it was 'established that he had stated' that Truman, Acheson and Eleanor Roosevelt were 'Leftist-influenced.' It is absurd on the face of it that a General should be reprimanded and relieved of his command for stating an obvious fact!"

Col. Loudon Heads TAC Enlisted Tasks

Col. Edward K. Loudon, Base Deputy Commander at Langley AFB, Va., has been reassigned to TAC Headquarters as Director of Enlisted Personnel.

Col. Leon H. Berger will succeed Col. Loudon.

Navy Nurse Bill Proposed

From page 3—

under appointment in grades above warrant officer, W-1.

However, the type of service which officers of the Nurse Corps can credit for voluntary retirement is specifically limited by a law originally applicable only to Regular officers, but extended to Reservists by the 86th Congress in August 1959.

Before that date, Reserve nurses could credit prior enlisted service. And because of the "savings clause" contained in the new law, officers who were Reserve nurses on 25 August 1959, were permitted to continue receiving such credit.

If such an officer subsequently were appointed as a Regular nurse, however, she would probably forfeit this accrued service credit, Secretary Fay said, and those individuals appointed as Reserve nurses on or after 25 August 1959 could not credit any prior enlisted service. Neither may Regular Navy Nurse Corps officers credit prior active enlisted service toward the required "20 years of active service."

The proposed new law would permit all Navy Nurses to count active enlisted service for the purpose of voluntary retirement.

Secretary Fay, in seeking the change, observed that the Navy has two enlistee procurement programs for the Nurse Corps and that officers commissioned from these programs may have prior active enlisted service in amounts ranging from eight months to five or more years.

Another result which the proposal is designed to accomplish is to insure that all officers of the Nurse Corps and Medical Service Corps of the Navy receive credit for active service as a nurse performed prior to 16 April 1947 toward the required 10 years' service as a commissioned officer.

Before 16 April 1947, members of the Navy Nurse Corps and Navy Nurse Corps Reserve had neither enlisted nor commissioned status. Enactment of the

Army-Navy Nurses Act of 1947 for the first time provided the authority to appoint nurses as commissioned officers.

For purposes of voluntary retirement, Navy Nurses are credit with commissioned service for service performed prior to 16 April 1947, but those who have transferred to the Medical Service Corps receive no such credit. The proposal would erase this inequity.

MOWW Reactivates Chapter At Tampa

The Tampa Chapter of the Military Order of the World Wars has been reactivated with 31 charter members under Cdr. H. P. McAuliffe, USN-Ret, Col. R. A. Knight, USA-Ret., presented the charter.

Officers elected to serve in addition to Commander McAuliffe were: Senior vice-commander, Col. Jerry Waterman, USAF-Ret.; Junior vice-commander, Col. James S. Morgan, USA-Ret.; Second junior vice-commander, Lt. Sid Lenfesty, USN-Ret.; Judge advocate, Col. Maynard Ramsey, Army; Adjutant, Col. Joseph Thury, USAFR; Historian, Col. L. P. Kleinoeder, USAF-Ret.; and Public relations, Col. Frank Hutchins, USAF-Ret.

A letter of commendation from the National Headquarters was presented to Colonel Waterman for securing 20 new members.

Col. Schantz Is Commended

Col. Oliver W. Schantz has been commended for "dedicated service while serving concurrently as Headquarters Commandant, UN Command/US Forces Korea/Eighth Army and Commanding Officer, Special Troops, Eighth Army."

He has departed Korea to assume duties as Deputy Commander, Camp Wolters, Tex.

M/G STREIT SUCCEEDS DR. BLOEDORN PRESIDENT OF GORGAS MEMORIAL INSTITUTE

THE Gorgas Memorial Institute, Washington, D. C., has elected Maj. Gen. Paul H. Streit, MC, USA-Ret., as president to succeed Dr. Walter A. Bloedorn, who resigned the post after serving the organization for four years.

To fill vacancies on the Board of Directors, Dr. John Parks, Dean of the George Washington University School of Medicine and Director of the George Washington University Hospital, and Dr. Eugene P. Campbell, Chief of the Office of Public Health of the International Cooperation Administration, were elected.

Elected for a three-year term were Dr. Stanhope Bayne-Jones; Dr. Bloedorn; Dr. Lawrence M. Drennan, Medical Director, United Fruit Company; Hon. Roberto Heurtematte, Commissioner for Technical Assistance, U. N. Organization; Congressman Joseph W. Martin, Jr.; Dr. Edward I. Salisbury; Maj. Gen. Julian L. Schley, USA-Ret., Member of the Board of Directors of the Panama Canal Company; General Streit; and Dr. Alexander Wetmore.

The slate of officers elected included in addition to General Streit, Hon. Maurice H. Thatcher, former Congressman from Kentucky and only surviving member of the Isthmian Canal Commission, Vice President and General Counsel; Dr. Louis L. Williams, Secretary; Mr. John M. Christie, Treasurer; and Mr. Donald A. McCormack, Assistant Treasurer.

A feature of the election meeting was the report of the activities of the Gorgas Memorial Laboratory, located in the city of Panama, R.P., and in 33d year of operation. The Laboratory represents the realization of plans which originated soon after the death of William Crawford Gorgas to honor him by the establishment of a permanent scientific institution dedicated to research in tropical and preventive medicine. The physical plant—land and a building—was a gift to the Institute from the Republic of Panama. The maintenance and operation of the laboratory is provided by an annual contribution from the United States Government. A year ago the Government also appropriated to the Institute \$500,000 for improvement of the laboratory facilities.

The President reported to the directors that plans and specifications for the new building had been completed, the construction contract let, and that ground is now being broken for the project.

Located on the Isthmus of Panama, the Gorgas Memorial Laboratory has been in the unique position of having its facilities in close proximity to tropical forest areas where many disease problems remain to be solved. The program has been concerned with both the diseases of man and those of animals. The unbroken record of continuity—the realization of the original plan to establish a permanent research center—has made it possible to undertake long-term projects such as basic studies of the distribution and cycles of abundance of insects and the diseases they transmit, notably malaria, trypanosomiasis, leishmaniasis and yellow fever.

Married

TRACY-PRICE—St Joseph's Church, Philadelphia, Pa 28 Oct Miss Frances McKee Price, daughter of Mr & Mrs Holland McKee Price, Cumberland, Md, and Lt (jg) Daniel O'Connell Tracy, Jr, USN, son of Mr & Mrs Tracy, Baltimore.

Died

BERNARD—Died Doctors' Hospital, Washington, DC 25 Oct, Mrs Barbara H Bernard, wife of Capt Lawrence J Bernard, USCG-Ret. Burial Arlington National Cemetery.

BITTIKOFER—Died Sacramento, Calif 28 Oct Lt Col Myron R Bittikofer, USA, 46. Survived by his widow, Mrs Arleen Bittikofer, 5700 So Grove Ave, Citrus Heights, Calif; and one daughter & two sons.

BUCKLEY—Died USNH, Chelsea, Mass recently Col Joseph E Buckley, USMC-Ret. Interment Arlington National Cemetery, Washington, DC.

CHAPMAN—Died Walter Reed GH, Washington, DC 4 Nov Mrs Viola H Chapman, wife of Maj William E Chapman, USAF, 596 So Magnolia Dr, Falls Church, Va. Also survived by eight children. Burial Arlington National Cemetery.

COUND—Died 6 Nov Col Oliver Edward Cound, USA-Ret. Survived by his widow, Mrs Maurice Cound, 2392 No Quebec St, Arlington, Va; two sons, Maj William T Cound, USA, Ft Leavenworth, Kans, & Prof John J Cound, University of Minnesota; and five grandchildren. Burial Arlington National Cemetery, 9 Nov.

DALTON—Died Walter Reed GH, Washington, DC 1 Nov Mrs Ellen Dalton, widow of Brig Gen Albert Clayton Dalton, USA-Ret. Survived by two nieces, Mrs Elizabeth Clarke Shaughnessy & Mrs Virginia Clarke Wigglesworth. Burial Arlington National Cemetery. She lived at 2540 Massachusetts Ave, NW, Washington.

DANIEL—Died New Orleans, La 25 Oct Capt Clarence N Daniel, USCG. Survived by his widow, Mrs Eunice L C Daniel; one daughter, Mrs Jean Akers; and two sons, Norman & C David Daniel. Burial Arlington National Cemetery, Washington, DC.

DAVIDSON—Died Ossining, NY 3 Nov Maj Henry F Davidson, ANG-Ret, 84, veteran of the Spanish-American War and of 28 years' service with the Guard. Survived by two sons, Lt Gen Garrison H Davidson, USA, Commander, Seventh U S Army, Germany, & Mr Marshall B Davidson; six grandchildren; and one great-grandchild.

HALPINE—Died USNH, Bethesda, Md 3 Nov Capt Charles G Halpine, USN-Ret. Survived by his widow, Mrs Helen B Halpine, 1 Taney Ave, Annapolis, Md. Burial Naval Academy Cemetery, Annapolis.

HAUCK—Died Washington, DC 6 Nov Capt Philip F Hauck, USN (USNA '38), 48, assigned to Office, Joint Chiefs of Staff. Survived by his widow, Mrs Virginia Hustvedt Hauck, Winchester, Mass, daughter of Vice Adm (USN-Ret) & Mrs Olaf M Hustvedt, 3525 Ordway St, NW, Washington; three children, Roger H, a senior at Harvard; Frederick H, a senior at Tufts; & Betty V Hauck, a high school student at Winchester, and one brother, RADM Hamilton O Hauck, USN-Ret. Burial Arlington National Cemetery, 9 Nov.

KENNEDY—Died Oak Knoll Naval Hospital, Oakland, Calif 4 Nov RADM Sherman S Kennedy, USN-Ret, (USNA '09), 73. Survived by his widow, Mrs Erna Kennedy, Napa, Calif.

MARK—Died Korea 24 Oct Col Louis Mark, USA, 46, of a heart attack. Survived by his widow, Mrs Alice M Mark, 3303 Oak Ridge Dr, Augusta, Ga; one daughter, Lauren Mark, 8; one son, Stephen Mark, 5; and his mother, Mrs Jennie Mark, 1018 Elk Grove Ave, Venice, Calif. Burial Long Island National Cemetery, Farmingdale, LI, NY.

SHIPP—Died of head injuries suffered in a fall from a horse, while hunting near Berryville, Va 2 Nov Col William E Shipp, USA-Ret, (USMA '16), 66. Survived by one sister. Burial Arlington National Cemetery, Washington, DC.

TANEY—Died Minneapolis, Minn 28 Oct after a prolonged illness, Lt Col Clifford A Taney, Jr, USA-Ret, (USMA '20). Survived by his widow, Mrs Miriam Taney, 1910 Knox Ave, So, Minneapolis.

WINKEL—Died 5 Nov Lt Col Paul P Winkel, USAR-Ret. Survived by his widow, Mrs Doris E Winkel, 1426 No Chambliss St, Alexandria, Va; one son, Capt Paul P Winkel, Jr, USA; and one daughter, Mrs Sidney W Orr. Burial Arlington National Cemetery, Washington, DC.

Marines Say M-14 Better Than M-1

Marines of the 2d Marine Division at Camp Lejeune, N. C., report that the M-14 rifle is better than the M-1.

Last week 299 men of the division fired the M-14 for annual requalification and the results were described as "impressive."

A delegation consisting of E. J. Cross and G. E. Taylor from Ordnance Weapons Command, Rock Island, Ill., joined with Captain Durham, Marine Corps Liaison Office, Capt. J. B. Harris, Headquarters Marine Corps, Ordnance Section, GySgt. G. L. Saltonstall, Rifle Team Equipment Armorer, Marine Corps Schools, Quantico, Va., and T. A. Tyner, production engineer, representing the Springfield Arsenal for the week of requalification.

The same 299 men fired the M-1 rifle last year. Their percentage of qualification was 94.2%. This year with the M-14, the percentage was an outstanding 95.3%.

The average score last year was 2084; this year it was 210.2. The most impressive statistic is that the number of "experts" and "sharpshooters" also increased. Rifle "experts" last year numbered 33; this year it was "upped" to 59. "Sharpshooters" were increased from 85 to 98.

Capt. L. W. Tucker, Executive Officer, Camp Lejeune Rifle Range, said: "The M-14 is a lighter, better balanced weapon than the M-1, also the hinged buttplate, similar to the one on the Browning Automatic Rifle, insures the shooter of a more stable position. These three factors account for the outstanding shooting we have seen here this past week."

Mal-functions were almost negligible. "Still another advantage of the M-14 is the chrome-plated bore, also the gas cylinder and piston are made with non-corrosive type metal, making the weapon much easier to maintain," Captain Tucker said.

Three complaints were made by range officials when the new rifle was first fired last month at Marine Corps Schools, Quantico, Va. These were: "Inaccuracy at the 500-yard line, the tendency of 'most' Marines to resist change and a shortage of experienced ordnance men."

The shooting of the Marines at Lejeune would seem to disprove at least two of these and possible all three. 1) scores went up during the slow fire strings, including the 500-yard line, 2) the Marines scores show they have the ability to change weapons and 3) there were few mal-functions while firing the rifle for record at Lejeune.

B/G D'Orsa To Jackson

Brig. Gen. Charles S. D'Orsa, CG, Combat Development Experimental Center, Ft. Ord, Calif., will be reassigned to the Army Training Center (Infantry), Ft. Jackson, S. C., in December. Maj. Gen. Leander L. Doan, CofS, Continental Army Command, Ft. Monroe, Va., will be retired 30 November.

National Guard Unit Will Get STRAC Status

A NATIONAL Guard unit with 183 years of military history and experience behind it is the STRAC component at Ft. Meade, Md. The 150th Armored Cavalry Regiment from West Virginia has replaced the 3d Armored Cavalry Regiment, which has gone to Europe in keeping with the current Army buildup program.

Commanded by Col. Daniel D. Holliday, the 150th is serving on active duty for the first time since WW II, when it was inducted into Federal service with the 38th Infantry Division.

Established 1 March 1778, as the Militia of Greenbrier County, Va., the 150th Regiment served in the Revolutionary War and in the Indian Territory during the War of 1812.

ADC Chief Speaks At William Tell

Lt. Gen. Robert M. Lee, anxious to obtain nation-wide understanding of the activities of the Air Defense Command which he heads, has issued a forceful statement on aerospace defense needs. He did this at a news conference which concluded the William Tell air defense competition at Tyndall AFB, Fla. (THE JOURNAL 4 November)

General Lee called for vigorous action to strengthen the air defense system, particularly with regard to obtaining new interceptor aircraft and assuring a high percentage of destruction against enemy missiles.

Here is General Lee's statement at Tyndall, where he presented trophies to the ADC winners.

GENTLEMEN, I am aware that at a news conference such as this, you gentlemen are supposed to ask the questions and I'm supposed to answer them. But by way of leading this off, I should like to reverse the procedure and ask—as well as answer—three questions:

Why do we need aerospace defense?
How good are our defenses?
Where do we go from here?

First, on the need for aerospace defense. As simply as I can put it, both deterrence of war and victory in the event of war depend importantly on aerospace defense. If our defenses are weak, then we might neither deter war nor win it.

We might not deter it because, without defenses, we are offering the enemy the opportunity to apply his weapons without defensive opposition. This nation simply could not give an enemy the tremendous advantage of unopposed nuclear attack.

Conversely, if an aggressor knows he must lose considerably more bombers than he can get through, he's going to think—not twice—but long and seriously before accepting such prohibitive odds.

His loss factor today is largely the sum of the ability of our strategic striking forces to attack hostile targets at their source plus that portion of his attacking force destroyed by our defensive forces.

Deterrent Force

Credible deterrence arises from the combined capability of our offensive and defensive forces to destroy the attacking force. Neither, by itself, can be called a deterrent force.

Now what if deterrence fails—which it can do for a number of irrational as well as rational reasons?

If this happens, the job of limiting damage to our country is largely in the hands of our defensive forces. If they have what it takes, this nation will emerge with "heads bloody but unbowed."

If they do not have what it takes, the job of recovering from a nuclear war will be far more difficult.

In the event of war, this nation will be hit, and probably seriously. No defenses can be 100% successful. But there is a difference between being hurt and being killed. It's time this distinction was widely recognized.

It's time all Americans started thinking about what happens when and if deterrence fails.

It's time we began to think of the second day and the second week of the war.

Overdue Emphasis

It is encouraging to note that there has recently been a sharp increase in public interest in air defense and in civil defense. This trend should be encouraged since it is long overdue.

So much for the necessity of air defense.

II

Now let me answer the question as to how good our present aerospace defense forces are.

Some years ago the statement was widely circulated that the best any air defense could do would be to knock down about 30% of an invading bomber fleet. This notion still seems to be widely believed today.

The result of this misconception has been a more or less fatalistic attitude about air attack in the atomic age. The defenses can get some of the invaders but the rest of them will get us, so why spend money on air defenses? This is also the same type of reasoning which has kept the average American from thinking beyond the point where deterrence fails.

Dangerous Misconception

Gentlemen, today let me try to bury this misconception for all time. It is not only false, it is dangerous to the security of this nation.

I am sure you are aware that we are constantly testing the capabilities of our air defenses. Using our own fleet of B-57 invaders, plus our T-33 jets and with an assist from SAC bombers, we continually run strikes against our air divisions, employing every trick and maneuver of which we are capable—and we think up some pretty good ones.

The consistent result of these tests has been that our defenses regularly knock down an impressively high percentage of the B-57 and T-33—a percentage several times greater than the predictions of not too many years ago.

Kill Capability Up

You have seen our weapon teams perform here at Tyndall. I think you will agree with me that their performance is excellent. We are running intercepts at altitudes and speeds which were only dreamed a few short years ago. Our kill capability has also increased many fold, and in actual combat we would be carrying a nuclear punch.

The point to remember is that William Tell performance is not a one-time show put on at Tyndall. The sort of interceptor kill capability demonstrated at the meet exists throughout the Air Defense Command.

This is what I meant when I mentioned a moment ago that an aggressor today must send several bombers if he wants one to get through. I do not think this capability of our air defense is generally understood.

In space defense, our position is not as good as it is against bombers. We presently have no active defense against missiles. What it boils down to is this: Of the basic functions of aerospace defense—surveillance, detection, identification, interception and destruction—we are

presently able to perform all of them well against the air-breathing threat.

Space Defense

Against the space threat, we are now performing the first three—surveillance, detection and identification—but we have no intercept or destruct capability.

Last March we activated at Colorado Springs what is called the SPADAT Center—Space Detection and Tracking.

This center is now operational. It is the focal point for all information received from a vast surveillance network which includes the Air Force Space Track and the Navy SPASUR systems. The SPADAT Center keeps a continually revised and updated catalog of all space objects—ours and everybody else's.

In July we activated the 9th Aerospace Defense Division to manage all of our space surveillance systems—SPADAT, BMEWS, and eventually such detection satellites as MIDAS.

This is why I can say that the organization for space defense is in existence and is operating. While you and I are sitting here, space surveillance, detection and identification are being performed at Colorado Springs.

The question of when we will get an interception and destruction capability for all space vehicles, including missiles, is part of the final question I proposed for myself. Where do we go from here? Let's tackle this one.

III

We hear a lot of comment these days, both within the military and outside of it, to the effect that we'll never really have a missile defense because you just can't hit a bullet with another bullet.

Manned Interceptor

As regards the manned interceptor, this same school contends that we have about reached its practical limitations.

Putting these two false premises together, we come up with a curious dilemma: Since the missiles will destroy our interceptor bases, we shouldn't waste money on interceptors, but we shouldn't try to build missile defenses either, because a really adequate defense against missiles is unattainable.

Gentlemen, let's look at the record.

What we attained in bomber defenses we attained in spite of the people who said that we could never achieve a kill probability in excess of 30%.

In WWII a kill capability of 15% against attacking bombers was generally considered excellent.

Today we are confronting any aggressor fleet with a loss probability far in excess of WWII experience and much greater than estimates of our most optimistic air defense experts of yesterday. This is based on our experience in testing our air defenses.

\$7 Billion Investment

We have attained this capability because we had the national will to attain it, and the national willingness to spend what was necessary to do it. In my command alone, this nation has invested almost seven billion dollars. This is what it takes to get a high percentage of attacking bombers.

It will take the same kind of national determination and a lot more national wealth if we are to get the same percentage of missiles. But granted the will to do it, I have not the slightest doubt about our scientific and technical capability to get the job done.

If we come in second in this race,
—Continued on page 28

Sperry Reports Gain In Polaris Program

Prototype production of tiny "space speedometers," which may help to double the range of the Navy's Polaris missile, is announced by the Sperry Gyroscope Company.

The company received a follow-on Navy contract for an undisclosed number of advance design accelerometers, vital components of inertial guidance systems which can sense and measure changes in the velocity of missiles in flight.

Sperry said that the accelerometers will be sub-miniature in size, an important factor in the design of a smaller, lighter and more accurate missile-borne guidance system expected to be a key to increasing Polaris range from 1,200 to 2,500 miles.

The Instrumentation Laboratory at the Massachusetts Institute of Technology designed the accelerometers for use as prototype units in its new MK2 Polaris missile guidance system. Sperry will turn out the improved devices to replace models it produced under an initial award a year ago.

JOURNAL CLASSIFIED

For only 14 cents a word (\$1.40) minimum, you can reach a world-wide audience through the classified advertising columns of the "Spokesman of the Services."

The Journal is the only weekly publication which covers all the U. S. Armed Forces. This assures top caliber impact for your message.

Deadline for insertions is 5 p.m. on Tuesday. Payment must accompany insertions. Write: Army Navy Air Force Journal, 1710 Connecticut Avenue, Washington 9, D. C., in the Capital area, phone: HObart 2-1220 and ask for Mrs. Howard.

REAL ESTATE FOR SALE OR RENT

Arizona

PLANNING RETIREMENT? Consider the delightful climate, better home buys and business opportunities afforded by the Phoenix area. Call or write E. H. Kibler, Colonel U.S.A. Retired, ED POST REALTY, Arizona's leading Real Estate Organization, 5060 No. Central Ave., Phoenix, Arizona.

Arkansas

INVESTIGATE Arkansas retirement. Mild, healthy climate, unexcelled natural beauty, inexpensive living, fishing, golf, bathing. Modern, fireproof apts. from \$70.00. Free brochure. MANOR APARTMENTS-MOTEL, HOT SPRINGS, ARKANSAS

California

SANTA BARBARA—On the blue Pacific. Close to military bases for PX, Commissaries, Hospital. Just 2 hours to L. A. Write for color brochure of your ideal retirement home. Colonel Wm. T. Brown, Ret'd. Assoc. MORRIS WILLIS Realtor—P. O. Box 3247, Santa Barbara, Calif.

Retire in Sunny California! I have four nice fertile Ranchoes approximately 2 acres each, adjacent to George Air Force Base with wonderful service facilities. Each Rancho has 165 feet frontage on good county road less than one mile from fast-growing Adelanto. Buy for only \$50 down and \$20 monthly! Write Col. B. M. Kelly, Ret., 1246 N. Mansfield Ave., Los Angeles 38, Cal.

Colorado

Colorado Springs—Coming to duty at Ent AFB, Fort Carson or Air Academy? Planning to retire? For better home buys write or call Col. Robert Totten, USAF-Ret., WEIDMAN & CO., Realtor 123 E. Bijou.

ENGINEERS AND TECHNICIANS U. S. and Overseas

Graduates of Sonar tech schools plus technician or engineering experience in: installation, repair and design modification of currently used Sonar equipment.

Military tech school graduate with installation repair experience on airborne, electronic, navigation and radar equipment, such as APN59/APN69 Systems. Must be capable of instructing military personnel on alignments, calibration and test equipment usage.

Military or civilian training and experience on air conditioning systems such as MA3, MA3M utilized in air force flight line operations. General knowledge of present airframes desirable. Technicians must repair, adjust and instruct in this regard.

Wire communication engineers, applications engineering of teletype and allied machine-to-machine military equipments and systems. Ability to instruct in installation, operation and maintenance.

Other specific field engineering areas: (1) Meteorological equipment specialist (electronic design and modification.) (2) Calibration and standards engineers. (3) Surveillance drone systems engineer (USD-1).

Send detailed resume with specific equipment experience to:

M/G BIDDLE RECEIVES DSM AT HOSPITAL

MAJ. GEN. Anthony J. Drexel Biddle (Ret. Res.), U. S. Ambassador to Spain, was presented the DSM 2 November at Walter Reed General Hospital, Washington, D. C. Awarded in July of this year, the medal presentation was held up until this week for lack of an appropriate opportunity for the presentation.

Secretary of the Army Elvis J. Stahr, jr., presented the award to the 64-year-old general officer for service from July 1945 to March 1961. General Biddle's wife, Margaret, and his son Nicholas, and General George H. Decker, Army CofS, attended the ceremony. Also present were Maj. Gen. Clinton S. Lyter, CG of Walter Reed Army Medical Center and Maj. Gen. Floyd C. Wergeland, Commander of Walter Reed Hospital.

General Biddle was admitted to Walter Reed General Hospital 13 October following a bout of pneumonia he suffered in Spain where he has been serving as Ambassador for the United States since 25 May, 1961. In the course of his treatment at Walter Reed he has undergone radiation therapy for a tumor discovered in the right upper lung.

From July, 1945, to April, 1955, General Biddle served consecutively as Chief of the Allied Contact Section in European Command Headquarters; Executive Officer in the Foreign Liaison Branch of Army Intelligence; Executive, National Military Representative for Supreme Headquarters, Allied Powers Europe (SHAPE), and as Special Assistant to the Army CofS. Following retirement from the active Army in April 1955, General Biddle returned to the state of his birth and assumed duties as Pennsylvania Adjutant General. His active role in this position, as noted in the citation accompanying the DSM medal, "immeasurably improved the overall effectiveness of the Pennsylvania Army and Air National Guard."

Noted, too, was his "assistance in formation of new units, development of retraining programs for converted units, and application of new organizational doctrines affected by the "One Army Concept."

A veteran of WW I and WW II, General Biddle served in the United States Army, rising to the grade of captain in October, 1918. He entered the diplomatic service prior to WW II, serving as Minister to Norway from 1935 until 1937. He became Ambassador to Poland in 1937, and Deputy Ambassador to wartime France in 1940. Between 1941 and 1944, he served as Ambassador Extraordinary and Plenipotentiary of the United States to the Governments of Poland, Belgium, the Netherlands, Norway, Greece, Yugoslavia, and Czechoslovakia, and Minister to Luxembourg.

Raytheon Names RAdm. Hauck To Missile Post; Aerojet Appoints Capt. Harkleroad

RAdm. Hamilton O. Hauck, USN-Ret., has been named Assistant General Manager of Raytheon Company's Missile & Space Division, Santa Barbara Operation. He had been Technical Director of Fairchild Stratos Corp.'s Electronic Systems Division, Long Island, N. Y. Until his retirement in 1958, Admiral Hauck was associated with several Navy missile programs. He held missile posts in the office of the Chief of Naval Operations, the office of the Secretary of Defense, was director of missile tests at the Navy's Pt. Mugu Calif. Missile Test Center, and later served as Director of the Guided Missile Division of the Bureau of Aeronautics. A USNA '38 graduate, Admiral Hauck has done graduate work in fire control and missile guidance at M.I.T. He is married to the former Patricia Maginnis of Portland, Oregon. They and their three children reside at 1057 Monte Drive, Santa Barbara.

Maj. Gen. John W. Libcke, CG, 70th Division (Training), Army Reserve (Indiana-Michigan), has retired. In civilian life, he is president of the Detroit Board of Assessors, and lives at 15081 Greenwood, Detroit.

Col. Joseph A. L. Greco, USAF-Ret., Missiles and Accessories Inventory Management Division Chief, Directorate of Material Management at the Warner Robins Air Material Area, Robins AFB, Ga., has retired after 25 years' service.

Lt. Col. Leland H. Langbein, USA-Ret., has assumed duties as Associate Professor and Head of the Department of Economics and Business Administration at Muskingum College, New Concord, Ohio.

CORRECTION—

Sinclair, Capt Cecil R, prev ors re his ret, IATR "ret as Maj."

AIRMEN RETIRED AS OFFICERS—

Goodwin, M/Sgt George E, as CWO-2.
Adamec, M/Sgt Anthony A, Jr, as CWO-2.

AIRMEN ADVANCED ON RET LIST—

Brady, M/Sgt Lester M, to WO-1.
Daniel, M/Sgt Carley R, to WO-1.

Col. Gerhardt C. Clemetson, USAF-Ret., former Head of the Department of Aerodynamics at the USAF Academy—he holds a Doctor of Science degree from Massachusetts Institute of Technology—and his family will make their home temporarily in Palos Verdes, Calif.

Capt. Neil E. Harkleroad, USN-Ret., has been appointed a Special Assistant in the Advanced Development Division, it is announced by Robert B. Young, Aerojet-General Corporation Vice President and Manager of the firm's Liquid Rocket Plant at Sacramento, Calif. Captain Harkleroad comes to Aerojet from his Navy post as Technical Director and Manager of the major Navy R&D laboratory at the David Taylor Model Basin, Washington, D.C.

Lt. Col. Irving S. Fleischer, USA-Ret., former Special Services Officer, U.S. Army Japan, who is married to Hiroko Wakayama, ballerina and dancing coach at the Nichigeki Main Theater, Tokyo, and father of a daughter, Rona, 7, will reside in the Azabu section of Tokyo, where he will be associated with a Tokyo commercial company.

Purdue Retired Course Is Closed

Purdue University has decided to discontinue the Retired Armed Services Training Program, in August 1962. This means that the last class is in residence and that no more applicants will be admitted to the program.

An official at the university said: "The decision to discontinue the Retired Armed Services Training Program, is due to some internal problems at Purdue, and in no way suggests that there is not a need for such a program. The shortage of high school and college teachers still exists and will continue to exist. Purdue University has demonstrated that Retired Officers can make a definite contribution to the problem of alleviating the shortage of teachers. Consequently, it is to be hoped that other institutions will carry on their programs for Retired Officers."

INDUSTRY IN DEFENSE

SecDef McNamara Gives Charter To DSA Under L/G McNamara

Secretary of Defense McNamara has issued a strong charter to the new Defense Supply Agency, under Lt. Gen. Andrew T. McNamara, and has declared that steps will be taken to assure "equitable distribution of positions among the Services and integrated career opportunities for officers, enlisted personnel, and civilian employees."

The decision to centralize management of common supplies and services was first announced 31 August. When it becomes fully operational, DSA will procure annually more than \$2.5 billion of supplies and materiel, and will manage

a multi-billion dollar inventory for peacetime mobilization requirements.

Approximately 1.2 million line items will be managed by the Agency.

General McNamara, a former Quartermaster General, was authorized by the newly issued charter to "operate and control" supply and service organizations, activities, and facilities assigned to the Agency.

He will recommend to Secretary McNamara the establishment of new supply facilities or the take-over or use of existing facilities of the Departments. He also will direct the consolidation, decentralization, or elimination of DSA facilities, operations, and functions to achieve maximum efficiency and economy.

The Agency assumed the functions of the Armed Forces Supply Support Center on 1 October.

Other functions will be assumed progressively upon approval of the Secretary of Defense. These include:

Military Subsistence Supply Agency (Army), Chicago.

Military Traffic Management Agency (Army), Washington, D. C.

Military Clothing and Textile Supply Agency (Army), Philadelphia.

Military Medical Supply Agency (Navy), Brooklyn.

Military Petroleum Supply Agency (Navy), Arlington, Va.

Military General Supply Agency (Army), Richmond.

Military Industrial Supply Agency (Navy), Philadelphia.

Military Automotive Supply Agency (Army), Detroit.

Military Construction Supply Agency (Army), Columbus, Ohio.

Armed Forces Surplus Property Bidders Registration and Sales Information Office, San Antonio.

Consolidated Surplus Sales Office.

These Agencies will continue to function as they have in the past until absorbed by DSA beginning early next year. Later, DSA will manage selective items of electronics and electrical materiel. A planning group, headed by Maj. Gen. Charles Root, USAF, is now at work to determine which items can be centrally managed, and where this activity should be located.

Temporary headquarters for DSA are in the Munitions Building, Washington, D. C. The Agency will move to its permanent home at Cameron Station, Alexandria, Va., next year.

Secretary of Defense McNamara has ruled that DSA shall administer the Defense Consolidated Procurement Program, Federal Catalog Program, Defense Standardization Program, Defense Materiel Utilization Program, and the Defense Surplus Property Disposal Program.

The Agency will operate a wholesale distribution system including warehouses and depots in the continental U. S., providing supplies and materiel to the Armed Services which will effect the retail distribution.

The new directive authorizes DSA to furnish direct support to field and operating forces in Alaska, Hawaii, and outside the U. S. when mutually agreed by the Agency and the Military Department.

In the supply management area, DSA will compute replenishment requirements, forecast supply requirements, determine which items will be centrally or locally procured, conduct inspection and quality control, conduct mobilization and industrial readiness planning, maintain inventory control, prescribe requisitioning procedures, and establish pricing procedures and prices for assigned items.

DSA will perform system analysis and design for assigned supply and service systems. It will compute special program and mobilization material requirements when authorized to do so by the Secretary of a Service.

Sperry Appoints L/C Viot As A V.P.; Kenneth Hallinan Joins Hiller Aircraft

Van H. Viot, a WWII Army lieutenant colonel and former Vice President of Employee Relations of the Crucible Steel Company, has been appointed Vice President of Industrial Relations for Sperry Gyroscope Company, division of Sperry Rand Corp., Great Neck, N. Y.

Kenneth F. Hallinan, former Director of Customer Relations of the American Machine and Foundry Company, will join Hiller Aircraft Corp. as Vice President of Marketing, it was announced by President Stanley Hiller, Jr., at Palo Alto, Calif. Mr. Hallinan will be responsible for both military and commercial marketing. He replaces former Vice President of Commercial Sales A. W. B. Vincent, who recently retired, but will assume the additional military relations function with an augmented staff of sales personnel. Mr. Hallinan and his wife Marguerite, have three sons.

William Callery, Jr., has been named Hiller Commercial Sales Manager, it is announced by Executive Vice President Edward T. Bolton. Callery moves up to the position from Domestic Sales Manager. Philip A. Johnston, former Hiller Assistant Sales Manager, now becomes Domestic Sales Manager.

Roy L. Queen has been appointed Operations Manager at Aerojet-General Corporation's Azusa, Calif., plant. He was named by W. L. Rogers, Vice President, Azusa Plant, to succeed E. R. Elko, who has become Vice President-Operations for Aerojet's subsidiary, Space General Corporation. Mr. Queen moves into his new post after serving as Director of Development Services and Manufacturing.

Dr. John G. Frayne has been appointed Manager of the Data Systems Department of The Marquardt Corporation's Pomona, Calif. Electronics Division, it is announced by Dr. Wendell B. Sell, Vice President and Division General Manager. Dr. Frayne will be responsible for directing all activities relating to the design and development of data processing and display systems.

Dr. Robert S. Carlson and J. N. Schmidt have been named Assistant Director of R&D and Chief Engineer of Inertial Navigation, respectively, by Autonetics, a division of North American Aviation, Inc.

Byron L. Allison has been named Vice President-Sales by Chicago Aerial Industries, Inc., Barrington, Ill. He was formerly Director of Sales. The post had been vacant since James H. Thompson was appointed Vice President/General Manager of CAI's Industries Division.

James R. Weiner has been named Associated Manager of the Guidance and Controls Division of Hughes Aircraft Company's Aerospace Group. It is announced by Roy E. Wendahl, Vice President and Group Executive. Mr. Weiner was formerly Vice President-Engineering for Philco Corporation's Government and Industrial Group in Philadelphia, where he was responsible for the coordination of the engineering and develop-

ment work of the five divisions within the group.

Robert R. Stephens has been appointed Chief Electronics Engineer for Vitro Electronics, a division of Vitro Corporation of America, Silver Spring, Md. He had been Chief Engineer for General Electronics Laboratory. G. C. Schutz, Vice President for Sales and Engineering, said Mr. Stephens will be responsible for all electronic engineering and design activity in a stepped-up development program at Vitro Electronics.

William B. Bergen, Martin Company President has announced establishment of a new executive position through which the company's accelerating ICBM and space booster programs will be directed. J. Donald Rauth, Vice President of Martin's Nuclear Division, has been elevated to the new post where he will be in charge of the entire Titan project, including activation of the near-operational Titan I, production and test of the advanced Titan II and continued development of Titan II's expanding space role in which Martin's Denver, Baltimore and Canaveral divisions already have a part. Mr. Rauth will make his headquarters in Denver and report directly to President Bergen. Dr. William L. Whitson will continue as Vice President of the Denver division, Albert L. Varrieur as Vice President of the Baltimore Division, and O. E. Tibbs as General Manager of the Canaveral Division.

Dr. Ralph D. Bennett, Director of Research, has been appointed a Vice President and will succeed Mr. Rauth as General Manager of the Nuclear Division.

SKYBOLT DEPUTY IS DOOLITTLE RAIDER

Brig. Gen. David M. Jones has been appointed Deputy Commander for the Douglas GAM-87 Skybolt, air-launched ballistic missile program, by the AFSC Aeronautical Systems Division at Wright-Patterson AFB, Ohio.

Formerly Vice Commander of ASD, General Jones is the second general officer appointed recently to head major systems programs at ASD. Brig. Gen. Fred J. Ascani is Deputy Commander for the North American Aviation B-70 bomber.

General Jones has served as Vice Commander since September 1960. Prior to being assigned here, he had been Test Director for the Convair B-58 Test Force at Carswell AFB, Tex.

General Jones was a pilot and flight commander of the famed Doolittle Raiders during the early days of WW II. Volunteering for the project in early 1942, he flew the first evaluation flights of the B-25 aircraft which were specially equipped for the mission.

After the raid on Tokyo, General Jones bailed out over China. With the assistance of the Chinese people, he was able to return to the United States. He was presented the DFC for his participation in planning, training and completion of the raid.

In September 1942, General Jones was assigned as Group Commander of the 319th Bomb Group in North Africa. On December 4, 1942, while on a low-level bombing mission, he was shot down over Bizerte, Tunisia, in North Africa, and spent 2 1/2 years as a prisoner of the Germans.

When assigned here last year, General Jones had flown more hours testing the B-58 than any pilot in the Air Force. He participated in design speed dashes, low level penetrations, night, weather, formation and in-flight refueling missions.

Lockheed Propulsion New Name For GCR

Lockheed Aircraft Corporation Board Chairman Courtland S. Gross has announced that the Grand Central Rocket Company, Redlands, Calif., has been renamed The Lockheed Propulsion Company.

Lockheed acquired complete ownership of the solid propellant manufacturing firm last 31 August. Before that time Lockheed held a 50% interest.

We have renamed the Redlands company for closer identification with Lockheed, Mr. Gross said. "We acquired the company as a natural extension and outgrowth of our long-time work in missiles and space."

Robert F. Hurt has been named President of the propulsion subsidiary, reporting to Lockheed Vice President Burt C. Monesmith.

The Redlands company has been active in the propellant field for 10 years, building a variety of solid fuel rockets for missile and space application.

Among its current projects, the company supplies separation rockets for the Titan missile, is developing the motor for the Army's solid fuel air defense missile Mauler under subcontract to General Dynamics/Pomona and is developing a high impulse nitroplastisol motor for use in upper stage rocket missions for the Air Force. The company reported that it is also making rapid progress in the development of Hybrid Rocket motors with a "start-stop-restart" capability for outer space use.

The company recently announced having successfully fired more than 50 motors loaded with its Polycarburene-R propellant at temperatures ranging from minus 100 degrees F. to plus 180 degrees F. Included in this series was the firing of the largest motor ever fired at minus 50 degrees F.

Lockheed Propulsion Company headquarters and research facilities are located at Redlands. The company has extensive test facilities in nearby Beaumont, Calif., and within the last year acquired approximately 4000 acres at Potrero, approximately seven miles from Beaumont, for future manufacturing needs.

B-47 MODIFICATION

Ling-Temco-Vought, Inc., Dallas, has received a contract valued at approximately \$160,000 for modification of two B-47E aircraft.

The contract was awarded to Temco Electronics and Missiles Company, a subsidiary, and the work will be accomplished by Temco Aerosystems, the subsidiary's Greenville, Tex., Division.

E. Fred Buehring, Vice President of Temco Electronics and Missiles Company, said the contract calls for installation and flight testing of special electronic subsystems and the required modification of the airframe to accept the new equipment.

Name Joe Lynch PR Of Hughes Aerospace

Joseph E. Lynch has been named manager of public and customer relations for Hughes Aircraft Company's aerospace group, Roy E. Wendahl, vice president and group head, announces.

Mr. Lynch will have responsibility for customer and public relations activities of nine divisions within the group, including facilities at Culver City, the Los Angeles International Airport, El Segundo, Calif., and Tucson, Ariz., Mr. Wendahl said. Included are such projects as Surveyor, the synchronous communication satellite (Syncom), ICBM defense, Falcon missiles and airborne weapon control systems.

DEVELOPMENT DEPUTY

RAdm. Charles E. Weakley is the new Assistant CNO for Development under VAdm. John T. Hayward.

A USNA '29 graduate Admiral Weakley had been Atlantic Fleet Destroyer Force Commander.

Admiral Weakley is married to the former Miss Geraldine Louise Cullen of Long Beach, California. They have two daughters, Geraldine and Linda.

Auto Insurance Rise Threatened

From first page—

which a base commander permits to operate at his installation must agree to notify the base commander promptly whenever a policy lapses, expires, is cancelled or is otherwise terminated.

Insurance companies complain that this requirement is leading to enormous costs in record keeping, clerical hire, postage, etc. These costs, they say, must be passed on to the insured in the form of higher premiums.

Under the directive each insurance company must (1) provide each of the base commanders where they operate with a list of all policies, together with their form numbers, to be offered on the installations, (2) assure that these are the only policies offered, and (3) give the name and complete address and phone number of each of their agents who will solicit on the base. This, the companies say, is burdensome and could be centralized in the Defense Department, thus saving time and money for both the insurers and the base commanders.

Individual Responsibility

One suggestion offered by the insurance companies is that instead of requiring the insurers to notify the base commanders when an individual policy lapses, expires or is cancelled, Service individuals should be charged with the responsibility. In other words, they say, require the Service individual to keep the commander informed of the status of his insurance and to notify him promptly if his auto insurance should no longer be in force.

An odd factor of the DoD directive is that it applies only to military and civilian operators of privately-owned vehicles registered or allowed parking or driving privileges on Defense installations within the United States. Thus, if an owner parks his car outside the base and does not drive on the base, he does not come within the requirements of the directive.

Meeting In Dallas

Mr. Leslie V. Dix, Chairman of the DoD Ad Hoc Committee on Automobile Insurance, told THE JOURNAL this week that he had heard no complaints on the Directive. However, he said, he will attend the meeting of the National Insurance Commissioners in Dallas next month and will be glad to discuss with them and the company representatives any complaints they may have as to the operation of the directive.

This Christmas Give The Journal To Your Friends and Relatives ... and save up to 40%

For Christmas 1961, give a gift of the Army Navy Air Force Journal at Special Holiday Rates. Your friends and relatives will enjoy The Journal—The Nation's only all Service weekly publication. Here is the ideal gift—the *one* gift for anyone in the Armed Forces—Regular or Reserve, Active or Retired. Use the Special Christmas Form now. We will mail the first copy of your gift subscription and a gift announcement signed with your name, in time to arrive before the Holidays. Certainly, you can pay later if you wish. We won't bill you until 1962. Send orders in today, for prompt, personal attention.

SPECIAL CHRISTMAS GIFT RATES: 1st Subscription \$7.50. (This may be a gift or an extension of your own subscription.) 2nd Subscription \$6.00. 3rd Subscription \$5.50. Four or more subscriptions at only \$4.50 each—a \$3.00 holiday saving.

Use the handy gift form below. Give a gift that will arrive each week.

ARMY NAVY AIR FORCE JOURNAL, 1710 CONNECTICUT AVE., N.W., WASHINGTON 9, D.C.

1st SUBSCRIPTION \$7.50

AEROSPACE MEDICAL DIVISION ACTIVATED

A NEW division of the Air Force Systems Command, known as the Aerospace Medical Division has been created with headquarters at Brooks AFB, Tex. The new organization commanded by Brig. Gen. T. C. Bedwell, jr., will include the Aerospace Medical Center; School of Aerospace Medicine; USAF Hospital, Lackland; 4th Casualty Staging Flight, Hq. 3790th Air Base Group, 3790th CEG; 3790th USAF Dispensary; 3790th Epidemiological Laboratory from the Air Training Command and, from the Alaskan Air Command, the Arctic Aeromedical Laboratory.

The new Aerospace Medical Division has become the sixth APSC Division. The other five are: Aeronautical Systems, Electronic Systems, Space Systems, Ballistic Systems and Foreign Technology.

Army-Marine Marksmen Take Five Titles; Seaman Sedlecky, USAF Maj. Knapp Do Well

A RMY and Marine Corps marksmen dominated U. S. International Shooting Championships at Ft. Benning, Ga., and captured five titles.

First of the three national championships to fall to the Army was the International skeet crown won by 1st Lt. James R. Clark of Army Advanced Marksmanship Unit. He posted a three-stage aggregate of 297X300. In the final stage, the Olympic gunner smashed 98 out of 100 targets to add to previous strings of 99X100 and take the national

laurels for the event.

Second place was won by Sgt. Major Harold A. Grewe, USAAMU, who had to win a shoot-off with U. S. Navy Seaman Kenneth D. Sedlecky, when both showed final totals of 294X300.

High Marine Corps competitor was 1st Sgt. Herschel Quesenberry, with 290X300, while Maj. Frank Knapp took Air Force honors with 291. High civilian was Gene S. Stalcup of Columbus, Ga., with 286.

The rapid fire pistol event was won by Marine Corps Capt. William B. McMillan with a match total of 1,768 out of a possible 1,800 points. The 1960 Olympic champion posted daily scores of 587-594-587 for the win.

Army 1st Lt. Cecil L. Wallace, USAAMU, took second award with 1,763 while Marine marksman MSgt. Frederick W. Filkins, listed 1,748 for third place.

Air Force Capt. Franklin Green, scored 1,740 and civilian entry John R. Hurst, Los Angeles Police, compiled high civilian total of 1,732.

Three Army riflemen placed in the International smallbore rifle three position event with Cpl. Gary L. Anderson of Axtell, Neb., winning the title with a three-day tally of 3,402 out of a possible 3,600 points, over 40 competitors.

Capt. Daniel B. Puckel, placed second 3,386 and 1st Lt. Tommy G. Pool, third with 3,378.

High Marine entry was Gunnery Sgt. Charles B. Ainscoe with 3,322 while T. T. Wu of Ann Arbor, Mich., turned in high civilian effort of 3,262. Airman David W. Barker listed high Air Force score of 3,247.

The Army's four-man International skeet team took national honors for the event which called for 800 targets per team. The Army posted 776X800 to win over three other service teams entered. The Air Force team smashed 763 clay birds, the Navy, 754, and the Marines, 742.

A Marine Corps four-man entry accounted for national laurels in the rapid fire pistol team event with 2,327 out of a possible 2,400.

The match called for 60 shots by each team member who fired once over the rapid fire pistol course. The Air Force tallied a team total of 2,312 and the Army 2,301 in the event which listed but three entries.

Aerospace Defense Needs Stressed

From page 23—

what happens to our position at the bargaining table, to say nothing of our military position?

Likewise with the manned interceptor, no one has yet explained to my satisfaction why we should stop here.

During this meet you have seen interceptors at 55,000 feet at Mach 1.5. Against today's threat this is excellent. But the Moscow air show last July unveiled some Soviet bombers which we estimate at better than Mach 2. This threat we must meet.

I am told that interceptors with speeds of Mach 3 to Mach 6 are within our capability. Against the ruthless opponent we face, I cannot see what logic dictates that we settle for anything less.

What I am saying in essence is this: My job as Commander ADC is to organize, train and equip the operational forces which the Commander-in-Chief NORAD needs for the air and space defenses of North America.

Up to this point I think we have done a good job of providing such forces. As proof of that, I give you the performance of our airmen at this meet.

My concern is for the future. Today, for the first time in my memory, no new weapons for aerospace defense are in production. This fact, I hope will not come home to haunt us in the future.

We urgently need an area defense weapon against missiles and we need an improved long range manned interceptor with all the speed range and destruction we can build into it.

■ Yesterday, the Grand Central Rocket Company was a partially-owned subsidiary of Lockheed. Now GCR is wholly owned, and it has a new name:

LOCKHEED PROPULSION COMPANY

■ The scientists of this new Lockheed company are among the most talented in the free world. Their facilities are modern and advanced — and getting more so every day. ■ You'll be hearing much more about this growing Space Age force.

■ Lockheed Propulsion Company, Redlands, Calif.
